Rulemaking Hearing Rule(s) Filing Form

Rulemaking Hearing Rules are rules filed after and as a result of a rulemaking hearing (Tenn. Code Ann. § 4-5-205).

Pursuant to Tenn. Code Ann. § 4-5-229, any new fee or fee increase promulgated by state agency rule shall take effect on July 1, following the expiration of the ninety (90) day period as provided in § 4-5-207. This section shall not apply to rules that implement new fees or fee increases that are promulgated as emergency rules pursuant to § 4-5-208(a) and to subsequent rules that make permanent such emergency rules, as amended during the rulemaking process. In addition, this section shall not apply to state agencies that did not, during the preceding two (2) fiscal years, collect fees in an amount sufficient to pay the cost of operating the board, commission or entity in accordance with § 4-29-121(b).

Revision Type (check all that apply):

☒ Amendment ☐ Content based on previous emergency rule filed on _____
☒ New ☐ Content is identical to the emergency rule
☐ Repeal

Rule(s) (ALL chapters and rules contained in filing must be listed here. If needed, copy and paste additional tables to accommodate multiple chapters. Please make sure that **ALL** new rule and repealed rule numbers are listed in the chart below. Please enter only **ONE** Rule Number/Rule Title per row.)

Chapter Number	Chapter Title
0720-31	Standards for Pediatric Emergency Care Facilities
Rule Number	Rule Title
0720-31-.01	Definitions
0720-31-.02	Licensing Procedure
0720-31-.03	Administration
0720-31-.04	Admissions, Discharges and Transfers
0720-31-.05	Basic Functions
0720-31-.06	Pediatric Trauma

Place substance of rules and other info here. Please be sure to include a detailed explanation of the changes being made to the listed rule(s). Statutory authority must be given for each rule change. For information on formatting rules go to <https://sos.tn.gov/publications/services/rulemaking-guidelines>.

Rule 0720—31—.01 Definitions is being amended by adding new paragraphs (3) and (4), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraphs shall read:

- (3) ACS. American College of Surgeons.
- (4) ALARA. As Low As Reasonably Achievable.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (6), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

- (6) ATLS. Advanced Trauma Life Support.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (9) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

- (9) CRPC. Comprehensive Regional Pediatric Center. The facility shall be capable of providing comprehensive specialized pediatric medical and surgical care to all acutely ill and injured children and shall have a pediatric intensive care unit. The center shall be responsible for serving as a regional referral center for the specialized care of pediatric patients or in special circumstances provide safe and timely transfer of children to other resources for specialized care.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (15) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

- (15) EED. Essential in Emergency Department.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (16) and renumbering the remaining paragraphs accordingly.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (16) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

- (16) EF. Essential in Facility.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (17), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

- (17) EFI. Essential in Facility and Immediately available within 15 minutes.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraphs (18) and (19) in their entirety and replacing them with the following language, so that as amended, the new paragraphs shall read:

(18) EMS. Emergency Medical Services.

(19) EMSC. Emergency Medical Services for Children.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (21) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(21) EP. Promptly available. Available within 30 minutes.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (22) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(22) EPI. Essential in Pediatric Intensive care unit.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (23) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(23) ES. Essential if Service not provided at facility.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (24), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(24) FAST. Focused Assessment with Sonography for Trauma.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (25) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(25) General Pediatric Emergency Care Facility. The facility shall have a defined separate pediatric inpatient service and a department of pediatrics within the medical staff structure. The facility may accept appropriate referrals of pediatric patients.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (26), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(26) General Pediatric Emergency Care Facility with a Pediatric Intensive Care Unit. A facility that meets the requirements of a General Pediatric Emergency Care Facility and has a dedicated Pediatric Intensive Care Unit meeting the requirements defined herein. The facility may accept appropriate referrals of pediatric patients.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (29), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(29) Immediately available. Available within 15 minutes.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (31), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(31) Mid-level practitioner. Either an Advanced Practice Registered Nurse or Physician Assistant.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (32) and renumbering the remaining paragraphs accordingly.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (32), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(32) MTP. Massive Transfusion Protocol.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (33) and renumbering the remaining paragraphs accordingly.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraphs (35) and (37), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraphs shall read:

(35) Patient and Family Centered Care. Patient and family centered care is a mutually beneficial partnership among health care providers, patients and families working together in the planning, delivery and evaluation of health care. The four core concepts of patient and family centered care are Dignity and Respect, Information Sharing, Participation and Collaboration.

(37) PECC. Pediatric Emergency Care Coordinator.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (38) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(38) PECF. Pediatric Emergency Care Facilities. Facilities that provide pediatric emergency and trauma services and are classified according to their abilities to provide such services. The classifications are: 1) Basic Pediatric Emergency Facility, 2) Primary Pediatric Emergency Facility, 3) General Pediatric Emergency Facility, 4) General Pediatric Emergency Care Facility with a Pediatric Intensive Care Unit and 4) Comprehensive Regional Pediatric Center.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (40) and renumbering the remaining paragraphs accordingly.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (40) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(40) PICU/PI. Pediatric Intensive Care Unit. A PICU is a separate physical unit specifically designated for the treatment of pediatric patients who, because of shock, trauma, or other life-threatening conditions, require intensive assessment, monitoring and care. A facility with a PICU shall self-designate as either a General Pediatric Emergency Care Facility with a PICU or a CRPC.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (41), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(41) PIPS. Performance Improvement and Patient Safety.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (42) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(42) Primary Pediatric Emergency Facility. The facility shall provide the same services as a Basic Pediatric Emergency Facility in addition to limited capabilities for the management of lower acuity pediatric admissions and observations.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (43), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(43) PTC. Pediatric Trauma Center.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (44) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(44) QA. Quality Assessment.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (45) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(45) QI. Quality Improvement.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (46), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(46) RA. Readily Available. Available within one hour.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (48) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(48) RT. Licensed Respiratory Therapist.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (49) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(49) SE. Strongly Encouraged.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (50), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(50) TNCC. Trauma Nursing Core Course.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (51) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(51) Trauma. A physical injury or wound caused by external force.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by adding new paragraph (52), and renumbering the remaining paragraphs accordingly, so that as amended, the new paragraph shall read:

(52) Trauma Program Leader. A trauma program director, manager or nurse coordinator.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (53) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(53) Trauma Registry. A central registry compiled of injury incidence information supplied by designated trauma centers and Comprehensive Regional Pediatric Centers (CRPCs).

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.01 Definitions is being amended by deleting newly-renumbered paragraph (54) in its entirety and replacing it with the following language, so that as amended, the new paragraph shall read:

(54) Trauma Team. Trauma Team consists of the necessary personnel commensurate with the level of trauma activation.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.02 Licensing Procedure is being amended by deleting paragraph (1) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(1) The facility shall designate the classification of Pediatric Emergency Care Facility it will maintain and the level of care it will provide and submit this information to the Department of Health on the joint annual report. If multiple facilities operate under the same provider number, each geographically distinct facility shall designate the level at which it provides service and will be surveyed at that level.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.03 Administration is being amended by deleting paragraph (1) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(1) The facility administration shall provide the following:

- (a) Adequate and properly trained personnel who can demonstrate competency in pediatric patient care delivery in their assigned area of the facility. This shall include, but is not limited to, the following required pediatric skills and competencies that are assessed annually:
 - 1. Recognition, interpretation and recording of age-appropriate physiological variables;
 - 2. Capable of managing pediatric shock and respiratory failure including early recognition and stabilization of problems that may lead to shock and respiratory failure;
 - 3. Medication administration and fluid administration;

4. Resuscitation (including cardiopulmonary resuscitation certification and PALS or similar certification);
 5. Respiratory care techniques;
 6. Preparation and maintenance of patient monitors; and
 7. Principles of patient and family centered care and psychosocial skills to meet the needs of both the patient and his/her family.
- (b) A policy requiring annual pediatric multidisciplinary mock codes for staff caring for pediatric patients.
- (c) A Physician Pediatric Emergency Care Coordinator and a Nurse Pediatric Emergency Care Coordinator responsible for assuring readiness of staff and facility to provide emergency services to children at the facility's designated level of care.
1. The physician PECC and the nurse PECC shall work collaboratively to facilitate all aspects of pediatric readiness within the facility. Aspects of pediatric readiness shall include, but are not limited to, multidisciplinary staff education, medication, equipment, supplies, quality and performance improvement, policies and procedures, integration of pediatric needs in facility disaster and/or emergency plans and collaboration with regional pediatric care agencies and committees.
 2. The physician and nurse PECCs may be concurrently assigned other roles in the ED or may oversee more than one program in the ED. The CRPC who has the educational agreement with the facility shall be notified of any changes in the Physician and Nurse PECC personnel.
 3. PECC roles may be shared through formal agreements with administrative entities when applied within facility systems.
- (d) The financial resources to provide the emergency department or the pediatric emergency department with the equipment necessary to provide the level of services of the designated PECF classification.
- (e) Facilities designed for easy access and appropriate for the care of pediatric patients at the designated PECF classification.
- (f) Access to emergency care for all urgent and emergent pediatric patients regardless of financial status.
- (g) Participation in a network of pediatric emergency care within the region where it is located by linking the facility with a regional referral center to:
1. guarantee transfer and transport agreements to include at least one CRPC, and
 2. refer critically ill patients to an appropriate facility.
- (h) Basic, Primary, General, and General with a PICU facilities shall have one education agreement with a CRPC.
- (i) A collaborative environment with EMS and EMSC systems to educate pre-hospital personnel, nurses and physicians.
- (j) Collaboration with pre-hospital care and transport.
- (k) Public education regarding access to pediatric emergency care, injury prevention, first aid and cardiopulmonary resuscitation.
- (l) A QA and QI program in all areas that provide pediatric care that shall include, but is not limited,

to the following indicators:

1. deaths;
2. incident reports;
3. child abuse cases;
4. cardiopulmonary or respiratory arrests;
5. admissions within forty-eight (48) hours after being discharged from the emergency department;
6. surgery within forty-eight (48) hours after being discharged from an emergency department;
7. pediatric transfers;
8. pediatric inpatient illness and injury outcome data;
9. Participation in a QI program in both a CRPC and a General Facility with a PICU which compares their PICU performance with PICUs of similar census and capabilities;
10. Program specific objectives for hospital pediatric readiness as defined by the current version of the U.S. Department of Health and Human Services' Health Resources and Services Administration's Maternal and Child Health Bureau's Emergency Medical Services for Children Program's National EMSC Performance Measures; and
11. Facilities shall participate in data collection to assure that quality indicators, as established by the Board are monitored; and the data shall be made available to a central data monitoring agency, as approved by the Board.

- (m) Resuscitation equipment and a metric weight-based medication resource are available in any area caring for a pediatric patient.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.03 Administration is being amended by deleting paragraph (2) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

- (2) In a Comprehensive Regional Pediatric Center, facility administration shall also:
- (a) Provide assistance to local and state agencies for EMS and EMSC in organizing and implementing a network for providing pediatric emergency care within a defined region that:
1. provides transfer and transport agreements with other classifications of facilities;
 2. provides transport services when needed for receiving critically ill or injured patients within the regional network;
 3. provides necessary consultation to participating network facilities;
 4. organizes and implements a network of educational support that:
 - (i) trains instructors to teach pediatric pre-hospital, nursing and physician-level emergency care;
 - (ii) assures that training courses are available to all facilities and health care providers utilizing pediatric emergency care facilities within the region;
 - (iii) supports EMS agencies and EMS Directors in maintaining a regional network of

- pre-hospital provider education and training;
 - (iv) assures dissemination of new information and maintenance of pediatric emergency skills;
 - (v) updates standards of care protocols for pediatric emergency care;
 - (vi) assures that emergency departments and pediatric intensive care units within the facility shall participate in regional education for emergency medical service providers, emergency departments and the general public;
 - (vii) provides public education and promotes patient and family centered care in relation to policies, programs and environments for children treated in emergency departments.
5. assists in organizing and providing support for regional, state and national data collection efforts for EMSC that:
- (i) defines the population served;
 - (ii) maintains and monitors pediatric specific quality indicators;
 - (iii) includes injury and illness epidemiology;
 - (iv) includes trauma/illness registry (this shall include severity, site, mechanism and classification of injury/illness, plus demographic information, outcomes and transport information);
 - (v) is adaptable to answer questions for clinical research; and
 - (vi) supports active institutional and collaborative regional and statewide research.
- (b) Organize a structured QI program with the assistance and support of local/state EMS and EMSC programs that allows ongoing review and:
- 1. reviews all issues and indicators described under all classifications of Pediatric Emergency Care Facilities emergency departments;
 - 2. provides feedback, quality review and information to all participating facilities, EMS and transport systems, and appropriate state agencies;
 - 3. develops quality indicators for the review of pediatric care which are linked to periodic continuing education and reviewed at all participating institutions;
 - 4. reviews all pediatric trauma and medical related morbidity and mortality, including those that are primary admitted patients versus secondary transferred patients; and
 - 5. evaluates the emergency services provided for children with an emphasis on patient and family centered philosophy of care, family participation in care, family support during emergency visits and transfers and family information and decision-making.
- (c) Provide the following pediatric emergency department/trauma center personnel:
- 1. A physician on duty in the emergency department who is board eligible or board certified and meets the requirements of maintenance of certification in pediatric emergency medicine; or was a credentialed pediatric emergency medicine provider in Tennessee prior to the promulgation of these rules.
 - 2. Physicians who are board eligible or board certified and meet the requirements of maintenance of certification, or who were credentialed providers in Tennessee prior to the promulgation of these rules in the following subspecialties: pediatric surgery,

pediatric orthopedic surgery, neurosurgery and pediatric anesthesiology.

- (i) These physicians shall be readily available to the emergency department twenty-four (24) hours per day, seven (7) days per week and shall also be promptly available around the clock as determined by the patient's acuity.
 - (ii) For on-call physician coverage, if the physician is not a pediatric subspecialty trained provider, then they should have sufficient training and experience in pediatric emergency and trauma care and be knowledgeable about current management of pediatric trauma and emergent medical problems in their specialty.
3. The CRPC shall also have other subspecialty trained surgical and medical providers who are board eligible or board certified and meet the requirements of maintenance of certification, or who were credentialed providers in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.
4. Registered nurses with pediatric emergency, pediatric critical care or pediatric surgical experience as well as training in trauma care;
5. Laboratory personnel, a radiology technician and a respiratory therapist with pediatric experience;
6. Available support services to the emergency department as included in Table 1;
7. A CRPC Coordinator position whose responsibilities include, but are not limited to:
 - (i) being a regional liaison and coordinator for the statewide EMSC project, including participation in CRPC Coordinator meetings quarterly;
 - (ii) planning and providing educational activities to meet the needs of the emergency network facilities and pre-hospital providers;
 - (iii) support of maintaining and updating the CRPC Pediatric Facility Notebook, which may be in electronic format;
 - (iv) review and coordination of quality improvement indicators for emergency network facilities and pre-hospital providers;
 - (v) attending a conference on pediatric emergency and/or critical care on a yearly basis;
 - (vi) serving as a resource person for national, state and regional EMS health professionals, health department officials, community colleges/universities, facilities, physicians, and professional societies to coordinate EMSC project activities and share program expertise in their regions; and
 - (vii) utilizing data collected by the CRPC from pre-hospital and facility records to provide data for performance improvement, education and research.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.04 Admissions, Discharges and Transfers is being amended by deleting paragraph (1) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

- (1) All levels of Pediatric Emergency Care Facilities shall:
 - (a) be capable of providing appropriate triage, resuscitation, stabilization and, when appropriate, timely transfer of pediatric patients for a higher level of care;
 - (b) be responsible for having appropriate transfer agreements to assure that all pediatric patients

receive timely emergency care at the most appropriate pediatric facility available;

- (c) have transfer agreements and transfer guidelines in accordance with the current Health Resources and Services Administration (HRSA) EMSC performance measures requirements;
- (d) have the ability to communicate with a Comprehensive Regional Pediatric Center for pediatric consultation; and
- (e) develop policies that describe safe transport and handoff of patients between all patient care areas of the facility and between other facilities.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.04 Admissions, Discharges and Transfers is being amended by deleting paragraph (5) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(5) A Comprehensive Regional Pediatric Center shall:

- (a) Assist with the provision of regional pre-hospital indirect (off-line) and direct (on-line) medical control for pediatric patients.
- (b) Promote a regional network of indirect and direct medical control by non-CRPC facilities within the region by working closely with the regional Emergency Medical Services medical directors to assure:
 - 1. standards for pre-hospital care;
 - 2. triage and transfer guidelines; and
 - 3. quality indicators for pre-hospital care.
- (c) Accept all patients who require a higher level of care not available at non-CRPC facilities through:
 - 1. prearranged transfer agreements to facilitate timely inter-facility triage and transfer of pediatric patients who need a higher level of care not available at the non-CRPC facility; and
 - 2. prearranged transfer agreements for pediatric patients needing specialized care not available at the Comprehensive Regional Pediatric Center.
- (d) Assure a pediatric transport service that:
 - 1. is available to all regional facilities;
 - 2. provides a network for transport of appropriate patients from all regional hospitals to the Comprehensive Regional Pediatric Center or to an alternative facility when necessary; and
 - 3. transports children to the most appropriate facility in their region for emergency and trauma care. Local destination guidelines for EMS should assure that in regions with two (2) Comprehensive Regional Pediatric Centers, or one (1) Comprehensive Regional Pediatric Center and another facility with Level 1 Adult Trauma capability, seriously injured children are cared for in the facility most appropriate for their injuries.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.05 Basic Functions is being amended by deleting paragraph (1) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(1) Medical Services.

- (a) A Basic Pediatric Emergency Facility shall have an on-call physician who shall be promptly available and provide direction for the emergency department nursing staff. The physician and associated mid-level practitioner(s) providing care in the emergency department shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. ATLS certification is strongly encouraged. A system shall be developed for access to physicians who have advanced airway and vascular access skills as well as for general surgery and pediatric specialty consultation. A back-up system must be in place for additional registered nurse staffing for emergencies. ATLS certification is strongly encouraged.
- (b) A Primary Pediatric Emergency Facility shall have an emergency physician in-house twenty-four (24) hours per day, seven (7) days per week. The emergency department physician shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. A pediatrician or family practitioner, general surgeon with trauma experience, anesthesiologist/anesthesiologist, and radiologist shall be promptly available twenty-four (24) hours per day. ATLS certification is strongly encouraged.
- (c) A General Pediatric Emergency Facility shall have a board certified or board eligible emergency physician or pediatrician in the emergency department twenty-four (24) hours per day, seven (7) days per week. The emergency department physician shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. A General Pediatric Emergency Facility shall have an emergency department medical director who is board certified or board eligible/admissible in pediatrics or emergency medicine. A record of the appointment and acceptance shall be in writing. The physician director shall work with administration to assure physician coverage that is highly skilled in pediatric emergencies. ATLS certification is strongly encouraged.
- (d) A CRPC and a PTC shall have an emergency department medical director who is board certified or board eligible in pediatric emergency medicine. A record of the appointment and acceptance shall be in writing.
- (e) A CRPC and a PTC shall have twenty-four (24) hours ED coverage by physicians who are board eligible or board certified and meet the requirements of maintenance of certification in pediatric emergency medicine, or who were credentialed pediatric emergency medicine providers in Tennessee prior to the promulgation of these rules. The medical director shall work with administration to assure highly skilled pediatric emergency physician coverage. All physicians in pediatric emergency medicine shall participate on at least an annual basis, in continuing medical education activities relevant to pediatric emergency care and shall have successfully completed the ATLS course at least once. Maintenance of current ATLS certification status is strongly encouraged.
- (f) A CRPC and a General Facility with a PICU shall have an appointed medical director of the pediatric intensive care unit. A record of the appointment and acceptance shall be in writing. The medical director of the pediatric intensive care unit shall have a minimum of three (3) years experience as an attending in pediatric critical care and shall be board certified and meet the requirements of maintenance of certification in pediatric critical care medicine or have been an existing medical director of a PICU prior to the promulgation of these rules.
- (g) In a CRPC and General Facility with a PICU, PICU physicians shall be credentialed by the facility to practice pediatric critical care medicine and be board eligible or board certified and meet the requirements of maintenance of certification in pediatric critical care medicine or have been a credentialed pediatric critical care provider in Tennessee prior to the promulgation of these rules.

- (h) In a CRPC and General Facility with a PICU, the pediatric intensive care unit and ED medical director shall participate in developing and reviewing their respective unit policies, promote policy implementation, participate in budget preparation, help coordinate staff education, maintain a database which describes unit experience and performance, supervise resuscitation techniques, lead quality improvement activities and coordinate research.
- (i) In a CRPC and General Facility with a PICU, the pediatric intensive care unit medical director shall name qualified substitutes to fulfill his or her duties during absences. The pediatric intensive care unit medical director or designated substitute shall have the institutional authority to consult on the care of all pediatric intensive care unit patients when indicated. He or she may serve as the attending physician on all, some or none of the patients in the unit.
- (j) The CRPC and General Facility with a PICU shall have at least one pediatric critical care physician promptly available to the PICU twenty-four (24) hours per day, and as well as an in-house physician with a minimum of post graduate year level 3 training with current PALS certification and is approved by the PICU medical director and/or a mid-level practitioner credentialed by the institution to provide pediatric critical care services, who is PALS trained, and is approved by the PICU medical director. All providers in pediatric critical care shall participate in continuing medical education activities as per facility policies relevant to pediatric intensive care medicine.
- (k) The CRPC shall have pediatric subspecialty trained surgical and medical providers who are board eligible or board certified and meeting the requirements of maintenance of certification in their subspecialty or who were credentialed providers in their subspecialty in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.05 Basic Functions is being amended by deleting paragraph (2) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(2) Nursing Services.

- (a) Emergency staff in all facilities shall be able to provide information on patient encounters to the patient's medical home through telephone contact with the primary care provider at the time of encounter, by faxing or by electronic means. Follow-up visits shall be arranged or recommended with the primary care provider whenever necessary.
- (b) In all Pediatric Emergency Facilities at least one RN shall be physically present 24 hours per day, 7 days per week, and capable of recognizing and managing pediatric shock and respiratory failure and stabilizing pediatric patients, including early recognition and stabilization of problems that may lead to shock and respiratory failure. At least one emergency room nurse per shift must be PALS certified. Certification in ENPC and TNCC is strongly encouraged.
- (c) A Pediatric General Emergency Facility shall have an emergency department nursing director/manager and at least one nurse per shift with pediatric emergency nursing experience. Nursing administration shall assure adequate staffing for data collection and performance monitoring as well as a registered nurse responsible for ongoing coordination of education in pediatric emergency care.
- (d) In a Comprehensive Regional Pediatric Center, administration shall provide nursing director/manager dedicated to the pediatric emergency department. The nurse director/manager shall have specific training and experience in pediatric emergency care and shall participate in the development of written policies and procedures for the pediatric emergency department, coordination of staff education, coordination of research, patient and family centered care, QI, and budget preparation in collaboration with the pediatric emergency department medical director. The nurse director/manager shall name qualified substitutes to fulfill the nurse director/manager's duties during absences.
- (e) In a Comprehensive Regional Pediatric Center, nursing administration shall provide nursing staff experienced in pediatric emergency and trauma nursing care and a registered nurse trained in

pediatric specific education/competencies responsible for ongoing staff education.

- (f) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide a nurse director/manager dedicated to the pediatric intensive care unit. The nurse director/manager shall have specific training and experience in pediatric critical care and shall participate in the development of written policies and procedures for the pediatric intensive care unit, coordination of staff education, coordination or research, patient and family centered care, QI and budget preparation in collaboration with the PICU medical director. The nurse director/manager shall name qualified substitutes to fulfill the nurse director/manager's duties during absences.
- (g) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide a pediatric nurse educator for pediatric emergency care and pediatric critical care education.
- (h) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide an orientation to the pediatric emergency department and the pediatric intensive care unit staff and specialized nursing staff shall be Pediatric Advanced Life Support certified. Administration shall assure staff competency in pediatric emergency care and intensive care.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.05 Basic Functions is being amended by deleting paragraph (3) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(3) Other Personnel.

- (a) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, the respiratory therapy department shall have a supervisor responsible for performance and pediatric training of staff, maintaining equipment and monitoring QI and review. Under the supervisor's direction, respiratory therapy staff assigned primarily to the pediatric intensive care unit and the emergency department shall be in-house twenty-four (24) hours per day and shall be PALS certified and maintain ongoing competencies.
- (b) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, biomedical technicians shall be available within one (1) hour. Unit secretaries or trained designees shall be available to the pediatric intensive care unit and emergency department twenty-four (24) hours per day. A radiology technician and pharmacist with pediatric training must be in-house 24 hours per day. In addition, social workers, case managers, physical therapists, occupational therapists, speech therapists, child life specialists, clergy and nutritionists/registered dieticians must be available.
- (c) In all PECF, the radiology department shall have guidelines for reducing radiation exposure that are age and size specific in accordance with ALARA or current American College of Radiology guidelines.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31—.05 Basic Functions is being amended by deleting paragraph (4) in its entirety and replacing it with the following language, so that, as amended, the new paragraph shall read:

(4) Facility Structure and Equipment.

- (a) Equipment for communication with EMS mobile units is essential if there is no higher-level facility capable of receiving ambulances or there are no resources for providing medical control to the pre-hospital system.
- (b) An emergency cart or other systems to organize supplies including resuscitation equipment, drugs, printed pediatric drug doses and pediatric reference materials must be readily available. Equipment, supplies, trays, and medications shall be easily accessible, labeled and logically organized. Antidotes necessary for a specific geographic area should be determined through

consultation with a poison control center. If the listed medications are not kept in the emergency department, they should be kept well organized and together in a location easily accessible and proximate to the emergency department.

- (c) A Comprehensive Regional Pediatric Center emergency department must have geographically separate and distinct pediatric medical/trauma areas that have all the staff, equipment and skills necessary for comprehensive pediatric emergency care. Separate fully equipped pediatric resuscitation rooms must be available and capable of supporting at least two simultaneous resuscitations.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Rule 0720—31 Standards for Pediatric Emergency Care Facilities is being amended by adding new rule 0720-31-.06 Pediatric Trauma, which shall read:

- (1) A CRPC and a state designated pediatric trauma center shall have a pediatric trauma program with the following requirements:
 - (a) A pediatric trauma medical director who shall be a pediatric surgeon, board certified/board eligible in pediatric surgery, with demonstrated competence in care of the injured child. The director shall have full responsibility and authority for the pediatric trauma program and shall meet the following requirements:
 1. 36 hours of category I external trauma/critical care CME every three (3) years or twelve (12) hours each year, and attend one national meeting whose focus is pediatric trauma or critical care every three (3) years;
 2. Participates in the physician call schedule;
 3. Has the authority to manage all aspects of trauma care;
 4. Authorizes trauma service privileges of the on-call providers;
 5. Works in cooperation with nursing administration to support the nursing needs of trauma patients;
 6. Develops treatment protocols along with the trauma team;
 7. Coordinates performance improvement and peer review processes;
 8. With the assistance of the facility administration and the trauma program coordinator, be involved in coordinating the budgetary process for the trauma program;
 9. Participates in regional and national trauma organizations; and
 10. Retains a current ATLS certification and participates in the provision of trauma-related instruction to other health care personnel.
 - (b) Current board certified/board eligible pediatric surgeons on the trauma service who shall have successfully completed the ATLS course at least once. Maintenance of current ATLS status is strongly encouraged.
 - (c) Shall be involved in local/regional EMS agencies/facilities and/or personnel and assist in trauma education, performance improvement, and feedback regarding care.
 - (d) A Trauma Program Leader who shall:
 1. Be an RN with experience in Pediatric Emergency and/or Critical Care Nursing;
 2. Have a defined job description and organizational chart delineating roles and responsibilities;

3. Be provided the administrative and budgetary support to complete educational, clinical, administrative and outreach activities for the trauma program; and
 4. Show evidence of educational preparation with a minimum of 12 hours internal or external of trauma related continuing education per year. This shall include attending one (1) national meeting within a three (3) year trauma program designated cycle.
- (e) Shall submit Trauma Registry data electronically to the state trauma registry on all closed patient files for the Board to analyze.
1. Data shall be transmitted to the state trauma registry in accordance with the state trauma rules. Failure to submit data may result in the delinquent facility's necessity to appear before the Board for any disciplinary action it deems appropriate.
 2. Shall have a full-time equivalent trauma registrar for each five hundred (500) through seven hundred fifty (750) trauma patients per year.
- (f) The pediatric trauma program must annually admit two hundred (200) or more pediatric trauma patients younger than fifteen (15) years of age. These admissions may include inpatient or twenty-three (23) hour observations, but should exclude patients admitted for drowning, poisoning, foreign bodies, asphyxiation or suffocation without presence of injury, patients who are dead on arrival to the facility or other pediatric patients excluded as per the most recent version of the Resources for Optimal Care of the Injured Patient by the American College of Surgeons Committee on Trauma.
- (g) Shall have a pediatric trauma committee chaired by the pediatric trauma medical director with designated representation from pediatric general surgery and liaisons to the trauma program from pediatric emergency medicine, pediatric critical care, neurosurgery, pediatric anesthesia, pediatric radiology, pediatric orthopedics, and the pediatric trauma program leader. The pediatric trauma committee shall meet at least quarterly. Members or designees shall attend at least fifty percent (50%) of meetings.
1. This committee shall assure participation in a pediatric trauma process improvement program with the following requirements and responsibilities:
 - (i) Administration shall provide resources to support the trauma process improvement program;
 - (ii) A performance improvement coordinator shall be designated with dedicated time for this responsibility;
 - (iii) The trauma registry shall be used to support the PIPS process;
 - (iv) Identify process and outcome measures;
 - (v) Have a morbidity and mortality review of trauma patients;
 - (vi) Maintain a Trauma Bypass/Diversion log:
 - (I) Trauma bypass/diversion shall not exceed five percent (5%).
 - (II) Pediatric surgery on-call shall be involved in bypass/diversion decisions.
 - (III) All bypass/diversions shall be reviewed.
 - (vii) Document and review response/consult times for pediatric surgeons, neurosurgeons, pediatric anesthesia, and pediatric orthopedists, all of whom must demonstrate eighty percent (80%) compliance with facility determined timed guidelines;

- (viii) Monitor team notification times. For highest level of trauma activation, the pediatric trauma surgeon must be present within fifteen (15) minutes of patient arrival eighty percent (80%) of the time;
 - (ix) Review pre-hospital trauma care to include patients dead on arrival;
 - (x) Review times, reasons and appropriateness of care for transfer of injured patients;
 - (xi) Demonstrate that action taken as a result of issues identified in the Process Improvement Program created a measurable improvement. Documentation shall include where appropriate: problem identification, analysis, preventability, action plan, implementation and reevaluation;
 - (xii) Evaluation of Operational Process Improvement (evaluation of systems issues) shall occur to address, assess, and correct global trauma program and system issues, and correct overall program deficiencies to continue to optimize patient care.
 - (h) Shall have clearly defined graded activation criteria,
 - 1. Criteria for the highest level of activation shall be clearly defined and evaluated by the pediatric trauma committee.
 - 2. For the highest level of activation, the trauma team shall be immediately available and the pediatric trauma attending available within fifteen (15) minutes of patient arrival eighty percent (80%) of the time, and shall include a trauma chief resident with three (3) to five (5) years of post-graduate year training or a Pediatric Emergency Physician.
 - (i) Shall have an injury prevention program which:
 - 1. Shall have an organized and effective approach to injury prevention and must prioritize those efforts based on trauma registry and epidemiologic data;
 - 2. Shall have a full-time injury prevention coordinator dedicated to the trauma program to ensure community and regional injury prevention activities are implemented and evaluated for effectiveness;
 - 3. Shall implement at least two programs that address one of the major causes of injury in the community; and
 - 4. Shall screen for alcohol and drug abuse in admitted patients.
 - (j) The PTC shall also have other subspecialty trained surgical and medical providers who are board eligible or board certified and meeting the requirements of maintenance of certification, or who are credentialed providers in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.
- (2) State Pediatric Trauma Center Designation
- (a) The Board shall implement the designation process.
 - (b) The preliminary designation process for facilities aspiring for designation as a Pediatric Trauma Center shall consist of the following:
 - 1. Each facility desiring designation shall submit an application to the Board;
 - 2. A Department site visit team ("team") shall review each submitted application and shall act in an advisory capacity to the Board;
 - 3. The team shall communicate deemed application deficiencies to the facility in writing;

4. The facility shall have thirty (30) days to submit required information; and
 5. Arrangements shall be made for a provisional site visit for those facilities meeting application requirements.
- (c) The site visit team shall consist of the following for Pediatric Trauma Centers:
1. A pediatric trauma surgeon medical director or a pediatric trauma surgeon who has previously been a medical director from an out-of-state pediatric trauma center who shall serve as team leader.
 2. A pediatric trauma surgeon from an in-state pediatric trauma center.
 3. An in-state pediatric trauma leader from a pediatric trauma center.
 4. The state trauma program manager and/or state EMS director.
- (d) The team shall be appointed by the state trauma system director and/or state trauma system assistant director.
- (e) The team shall conduct a provisional visit to ensure compliance with all criteria required for designation as a Pediatric Trauma Center. During the provisional visit, the applicant shall demonstrate that the required mechanisms to meet the criteria for the desired designation level are in place.
- (f) The team shall identify deficiencies and areas for improvement it deems necessary for designation.
- (g) If the team does not cite any deficiencies and concludes that the facility is otherwise in compliance with all applicable standards, it shall approve the applicant to function with provisional status for a period of one (1) year.
- (h) If, during the provisional visit, the team cites deficiencies, it shall not approve provisional status for the applicant to function as a Pediatric Trauma Center. Centers with deficiencies shall have fifteen (15) days from receipt of the deficiency report to provide documentation demonstrating compliance. If the facility is unable to correct the deficiencies within fifteen (15) days, the application shall be denied, and the applicant may not resubmit an application for trauma center designation for at least one (1) year from the date of denial.
- (i) Facilities granted provisional status as a Pediatric Trauma Center shall adhere to the following:
1. The facility shall be prepared to provide:
 - (i) A description of changes made after the grant of provisional status;
 - (ii) A description of areas of improvement cited during the provisional visit; and
 - (iii) A summary of the facility's trauma service based on the trauma registry report.
 2. The team shall conduct a site visit at the termination of the applicant's one (1) year provisional designation as a Pediatric Trauma Center.
 3. During the follow-up visit, the team shall identify the presence of deficiencies and areas of improvement.
- (j) Upon completion of the follow-up visit, the team shall submit its findings and designation recommendation to the Board.
1. If the team cites deficiencies found during its follow-up visit, they shall be included in its report to the Board.

2. At the time that the team's report is presented to the Board, the facility requesting Pediatric Trauma Center designation shall be allowed to present evidence to the Board demonstrating action taken to correct the cited deficiencies.
- (k) The final decision regarding Pediatric Trauma Center designation shall be rendered by the Board. If granted, the designation is in effect for a period of three (3) years.
 - (l) If the Board denies the application, the facility may not reapply for at least one (1) year. If provisional status was granted, such status will be revoked.
 - (m) The facility applying for Pediatric Trauma Center designation shall bear all costs of the application process, including the costs of a site visit.
 - (n) A facility seeking a consultation/verification site visit through the American College of Surgeons as a Level I Pediatric Trauma Center shall coordinate with state trauma system director and/or state trauma system assistant director to ensure his/her attendance at the ACS site visit. If state trauma system director and/or state trauma system assistant director is unable to attend the site visit, the finalized report from the site visit shall be shared with the state trauma system director and/or state trauma system assistant director for presentation to the Board if the facility seeks a reciprocal designation as a Pediatric Trauma Center.
 - (o) Denial of Provisional or Full Designation. When the Board denies provisional or full designation, it must provide the facility with a written notification of the action and the basis for the action. The notice will inform the facility of the right to appeal and the procedure to appeal the action under the provisions of the Uniform Administrative Procedures Act.
- (3) State Pediatric Trauma Center Verification
- (a) Following designation as a pediatric trauma center, a verification site visit shall be conducted at the facility every three (3) years.
 - (b) The team shall advise the center of an upcoming verification visit at least sixty (60) days prior to the visit. After the facility receives notice of the upcoming verification site visit, it shall prepare all materials the team requests for submission.
 - (c) The team shall conduct an exit interview with the facility at the conclusion of the verification visit.
 - (d) During the exit interview the team shall communicate the following:
 1. The presence of deficiencies;
 2. The facility's strengths and weaknesses; and
 3. Recommendations for improvements and correction of deficiencies.
 - (e) The team shall submit a site visit report within sixty (60) days of completion of the site visit. It shall submit a copy of the report to the Board, the Chief Executive Officer of the facility, the Pediatric Trauma Medical Director and the Pediatric Trauma Program Manager (TPM).
 - (f) If the team does not cite deficiencies and the center is in compliance with all applicable standards, it shall recommend that the facility maintain its designation as a Pediatric Trauma Center for a period of three (3) additional years.
 - (g) If during the site visit the team identifies deficiencies, the center shall have a period not to exceed sixty (60) days to correct deficiencies.
 - (h) If the team ascertains that deficiencies have not been corrected within sixty (60) days, whether through desk review or an on-site visit, the center must present an explanation to the Board at its next scheduled meeting.

- (i) The facility shall bear all costs of the verification process, including the costs of a site visit.
 - (j) If a Pediatric Trauma Center already designated by the Board elects to undergo an American College of Surgeons Pediatric Level I trauma center consultation/verification site visit, the facility shall coordinate with the state trauma system director and/or state trauma system assistant director to ensure his/her attendance at the review. If the state trauma system director and/or state trauma system assistant director is unable to attend the site visit, the finalized report from the site visit shall be shared with the state trauma system director and/or state trauma system assistant director for presentation to the Board if the facility seeks a reciprocal state designation as a Pediatric Trauma Center.
- (4) State Pediatric Trauma Center Disciplinary Action
- (a) The Board may, in accordance with the Uniform Administrative Procedures Act, revoke, suspend, place on probation, or otherwise discipline, a facility's trauma center designation.
 - (b) The Board may revoke, suspend, place on probation, or otherwise discipline, the designation or provisional status of a center when an owner, officer, director, manager, employee or independent contractor:
 - 1. Fails to comply with the provisions of these rules;
 - 2. Makes a false statement of material fact about the center's capabilities or other pertinent circumstances in any record or matter under investigation for any purposes connected with these rules;
 - 3. Prevents, interferes with, or attempts to impede in any way, the work of a representative of the Board;
 - 4. Falsely advertises or in any way misrepresents the facility's ability to care for patients based on its designation status;
 - 5. Fails to provide reports required by the trauma registry or the Commission in a timely and complete fashion; or
 - 6. Fails to comply with or complete a plan of correction in the time or manner specified.
 - (c) Denial of Provisional or Full Designation. When the Board denies provisional or full designation, it must provide the center with a written notification of the action and the basis for the action. The notice will inform the center of the right to appeal and the procedure to appeal the action under the provisions of the Uniform Administrative Procedures Act.
- (5) State Pediatric Trauma Center Prohibitions
- (a) It shall be a violation of these regulations for any health care facility to hold out, advertise or otherwise represent itself to be a "trauma center" as licensed by the Board unless it has complied with the regulations set out herein and the Board has so designated it.
 - (b) Any facility the Board designates as a trauma center, at any level, shall comply with the requirements of EMTALA. The medical needs of a patient and the available medical resources of the facility, rather than the financial resources of a patient, shall be the determining factors concerning the scope of service provided.
 - (c) The term "trauma center" refers to a main facility campus that has met all requirements to satisfy trauma center rule designation. Off campus sites are excluded in this designation.

Authority: T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251.

Chapter 0720-31 is being amended by deleting Table 1 in its entirety and replacing it with the following language, so that, as amended, the new Table 1 shall read:

Table 1 (Parts 1-6) provides a summary for emergency care facilities for each level of pediatric health care. Personnel, equipment, and issues that are essential at each designation or level are described as either being essential in the emergency department (EED), essential in the pediatric intensive care unit (EPI), essential within the facility (EF), essential in the facility and immediately available within 15 minutes (EFI), or promptly available (EP). An optional but strongly encouraged category (SE) is used to describe personnel, activities or issues that may be essential to network a comprehensive regionalized EMS-EMSC system in rural areas. Although these are not generally required of a specific facility, they are strongly encouraged if such services are not available within a reasonable distance.*

*Some services are usually available at a Comprehensive Regional Pediatric Center but, if not provided, then transfer agreements must be in place (ES). Other capabilities must be available in the pediatric intensive care units but should be promptly available to the emergency department and facility (EPI and EP).

1 All medical specialists shall have pediatric expertise as evidenced by board certification, fellowship training, or demonstrated commitment and continuing medical education in their subspecialty area.

2 A forensic pathologist must be available either as part of the facility staff or on a consulting basis.

3 Medications may be exempted if the facility can demonstrate PALS recommendation changes, manufacturer recalls or shortages, or Food and Drug Administration requirement issues.

4 A resident in postgraduate year >3 or a pediatric emergency attending physician who is part of the trauma team may be approved to begin resuscitation while awaiting the arrival of the pediatric surgery attending/fellow, but cannot independently fulfill the responsibilities of, or substitute for, the pediatric surgery attending/fellow. The presence of such a resident or attending pediatric emergency physician may allow the surgery attending/fellow to participate in the physician call schedule from outside the facility.

5 This requirement can also be met by having one surgeon who is board certified or board eligible with demonstrated interest and skills in pediatric neurosurgical trauma care. This is evidenced by 12 hours of pediatric neurosurgical CMEs per year, of which 8 are pediatric trauma care.

6 The Vascular surgeon requirement may be provided by a pediatric trauma surgeon.

Public Hearing Comments

Dr. Kevin Brinkmann spoke in support of the proposed amendments to the Standards for Pediatric Emergency Care Facilities, on behalf of himself and the dozens of Pediatric Emergency Care providers who worked on these rules. They consider these changes necessary to improve the quality of care.

The Tennessee Academy of Physician Assistants, represented by Katherine Pesut Moffat, submitted comments requesting that the term "mid-level practitioner" be changed, as TAPA considers it to be pejorative. The Commission's Executive Director met privately with representatives from TAPA during the meeting, and it was agreed that the term - which is found in other rules and federal regulations - be discussed with stakeholders at a later date.

Regulatory Flexibility Addendum

Pursuant to T.C.A. §§ 4-5-401 through 4-5-404, prior to initiating the rule making process, all agencies shall conduct a review of whether a proposed rule or rule affects small business.

Pursuant to T.C.A. §§ 4-5-401 through 4-5-404, prior to initiating the rule making process, all agencies shall conduct a review of whether a proposed rule or rule affects small business.

The proposed rule is not expected to affect small businesses.

Impact on Local Governments

Pursuant to T.C.A. §§ 4-5-220 and 4-5-228, "On any rule and regulation proposed to be promulgated, the proposing agency shall state in a simple declarative sentence, without additional comments on the merits or the policy of the rule or regulation, whether the rule or regulation may have a projected financial impact on local governments. The statement shall describe the financial impact in terms of increase in expenditures or decrease in revenues."

No increase or decrease in local government expenditures is anticipated.

Additional Information Required by Joint Government Operations Committee

All agencies, upon filing a rule, must also submit the following pursuant to T.C.A. § 4-5-226(i)(1).

- (A) A brief summary of the rule and a description of all relevant changes in previous regulations effectuated by such rule;

The rules are intended to modernize Standards for Pediatric Emergency Care Facilities and improve the quality of care.

- (B) A citation to and brief description of any federal law or regulation or any state law or regulation mandating promulgation of such rule or establishing guidelines relevant thereto;

T.C.A. §§ 68-11-202, 68-11-209, and 68-11-251

- (C) Identification of persons, organizations, corporations or governmental entities most directly affected by this rule, and whether those persons, organizations, corporations or governmental entities urge adoption or rejection of this rule;

Pediatric Emergency Care Facilities would be most directly affected. The Committee of Pediatric Emergency Care has worked for several years with dozens of pediatric care providers to craft these rules.

- (D) Identification of any opinions of the attorney general and reporter or any judicial ruling that directly relates to the rule or the necessity to promulgate the rule;

None

- (E) An estimate of the probable increase or decrease in state and local government revenues and expenditures, if any, resulting from the promulgation of this rule, and assumptions and reasoning upon which the estimate is based. An agency shall not state that the fiscal impact is minimal if the fiscal impact is more than two percent (2%) of the agency's annual budget or five hundred thousand dollars (\$500,000), whichever is less;

No increase or decrease in local government expenditures is anticipated.

- (F) Identification of the appropriate agency representative or representatives, possessing substantial knowledge and understanding of the rule;

Robert Seesholtz, Trauma System Director

- (G) Identification of the appropriate agency representative or representatives who will explain the rule at a scheduled meeting of the committees;

Katie Thomas and Robert Seesholtz, Trauma System Director will explain for the Commission; Dr. Kevin Brinkmann will be present for the Committee on Pediatric Emergency Care, and will be the best source for information about the rule.

- (H) Office address, telephone number, and email address of the agency representative or representatives who will explain the rule at a scheduled meeting of the committees; and

Katie Thomas, Health Facilities Commission, Andrew Jackson State Office Building, 9th Floor, 502 Deaderick Street, Nashville, TN 37243, 615-741-2364, Katie.Thomas@tn.gov

- (I) Any additional information relevant to the rule proposed for continuation that the committee requests.

**RULES
OF
THE TENNESSEE HEALTH FACILITIES COMMISSION**

**CHAPTER 0720-31
STANDARDS FOR PEDIATRIC EMERGENCY CARE FACILITIES**

TABLE OF CONTENTS

0720-31-.01	Definitions	0720-31-.04	Admissions, Discharges and Transfers
0720-31-.02	Licensing Procedure	0720-31-.05	Basic Functions
0720-31-.03	Administration		

0720-31-.01 DEFINITIONS.

- (1) Abuse. The willful infliction of injury, unreasonable confinement, intimidation or punishment with resulting physical harm, pain or mental anguish.
- (2) ACLS. Advance Cardiac Life Support.
- (3) ACS. American College of Surgeons.
- (4) ALARA. As Low As Reasonably Achievable.
- (35) APLS. Advanced Pediatric Life Support.
- (6) ATLS. Advanced Trauma Life Support.
- (47) Basic Pediatric Emergency Facility. The facility shall be capable of identifying those pediatric patients who are critically ill or injured, stabilizing pediatric patients, including the management of airway, breathing and circulation, and providing an appropriate transfer to a definitive care facility.
- (58) Board. Board for Licensing Health Care Facilities.
- (69) CRPC. Comprehensive Regional Pediatric Center. The facility shall be capable of providing comprehensive specialized pediatric medical and surgical care to all acutely ill and injured children and shall have a pediatric intensive care unit. The center shall be responsible for serving as a regional referral center for the specialized care of pediatric patients or in special circumstances provide safe and timely transfer of children to other resources for specialized care.~~Comprehensive Regional Pediatric Center (CRPC). The facility shall be capable of providing comprehensive specialized pediatric medical and surgical care to all acutely ill and injured children. The center shall be responsible for serving as a regional referral center for the specialized care of pediatric patients or in special circumstances provide safe and timely transfer of children to other resources for specialized care.~~
- (710) CPR. Cardiopulmonary Resuscitation.
- (811) Do-Not-Resuscitate order (DNR). A written order, other than a POST, not to resuscitate a patient in cardiac or respiratory arrest in accordance with accepted medical practices.
- (912) E. Essential.
- (4013) ECG. Electrocardiogram.

(Rule 0720-31-.01, continued)

- (1414) ED. Emergency Department.
- (1215) EED. Essential in Emergency Department. ~~EED. Essential in emergency department.~~
- (13) ~~EED&EPI. Essential in emergency department and pediatric intensive care unit.~~
- (1416) EF. Essential in Facility. ~~EH. Essential in hospital.~~
- (17) EFI. Essential in Facility and Immediately available within 15 minutes.
- (18) EMS. Emergency Medical Service.
- (19) EMSC. Emergency Medical Services for Children.
- (15) ~~EMS. Emergency medical service.~~
- (16) ~~EMSC. Emergency medical service for children.~~
- (2017) ENPC. Emergency Nursing Pediatric Course.
- (1821) EP. Promptly Available. Available within 30 minutes. ~~EP. Promptly available.~~
- (22) EPI. Essential in Pediatric Intensive care unit.
- (19) ~~EPI. Essential in pediatric intensive care unit only.~~
- (23) ES. Essential if Service not provided at facility. ~~(20)ES. Essential if service not provided at hospital.~~
- (24) FAST. Focused Assessment with Sonography for Trauma.
- (25) General Pediatric Emergency Care Facility. The facility shall have a defined separate pediatric inpatient service and a department of pediatrics within the medical staff structure. The facility may accept appropriate referrals of pediatric patients.
- (21) ~~General Pediatric Emergency Facility. The facility shall have a defined separate pediatric inpatient service and a department of pediatrics within the medical staff structure. The facility may accept appropriate referrals of pediatric patients from Basic and Primary Pediatric Emergency Facilities as part of prearranged triage, transfer and transport agreements.~~
- (26) General Pediatric Emergency Care Facility with a Pediatric Intensive Care Unit. A facility that meets the requirements of a General Pediatric Emergency Care Facility and has a dedicated Pediatric Intensive Care Unit meeting the requirements defined herein. The facility may accept appropriate referrals of pediatric patients.
- (2227) ICP. Intracranial Pressure.
- (2328) IM. Intramuscular.
- (29) Immediately available. Available within 15 minutes.
- (2430) IV. Intravenous.
- (31) Mid-level practitioner. Either an Advanced Practice Registered Nurse or Physician Assistant.

(Rule 0720-31-.01, continued)

~~(25) Misappropriation of patient/resident property. The deliberate misplacement, exploitation or wrongful, temporary or permanent use of an individual's belongings or money without the individual's consent.~~

~~(32) MTP. Massive Transfusion Protocol.~~

~~(26) Neglect. The failure to provide goods and services necessary to avoid physical harm, mental anguish or mental illness; however, the withholding of authorization for or provision of medical care to any terminally ill person who has executed an irrevocable living will in accordance with the Tennessee Right to Natural Death Law, or other applicable state law, if the provision of such medical care would conflict with the terms of the living will, shall not be deemed "neglect" for purposes of these rules.~~

~~(2733) OR. Operating Room.~~

~~(2834) PA. Physician's Assistant.~~

~~(35) Patient and Family Centered Care. Patient and family centered care is a mutually beneficial partnership among health care providers, patients and families working together in the planning, delivery and evaluation of health care. The four core concepts of patient and family centered care are Dignity and Respect, Information Sharing, Participation and Collaboration.~~

~~(2936) PALS. Pediatric Advanced Life Support.~~

~~(37) PECC. Pediatric Emergency Care Coordinator.~~

~~(38) PEECF. Pediatric Emergency Care Facilities. Facilities that provide pediatric emergency and trauma services and are classified according to their abilities to provide such services. The classifications are: 1) Basic Pediatric Emergency Facility, 2) Primary Pediatric Emergency Facility, 3) General Pediatric Emergency Facility, 4) General Pediatric Emergency Care Facility with a Pediatric Intensive Care Unit and 4) Comprehensive Regional Pediatric Center.~~

~~(30) Pediatric Emergency Care Facilities. Hospital facilities that provide emergency services and are classified according to their abilities to provide such services. The classifications are: 1) Basic Pediatric Emergency Facility, 2) Primary Pediatric Emergency Facility, 3) General Pediatric Emergency Facility, and 4) Comprehensive Regional Pediatric Center.~~

~~(3439) Physician. A person currently licensed as such by the Tennessee Board of Medical Examiners or currently licensed by the Tennessee Board of Osteopathic Examination.~~

~~(32) Physician Assistant. A person who has graduated from a physician assistant educational program accredited by the Accreditation Review Commission on Education for the Physician Assistant, has passed the Physician Assistant National Certifying Examination, and is currently licensed in Tennessee as a physician assistant under title 63, chapter 19.~~

~~(40) PICU/PI. Pediatric Intensive Care Unit. A PICU is a separate physical unit specifically designated for the treatment of pediatric patients who, because of shock, trauma, or other life-threatening conditions, require intensive assessment, monitoring and care. A facility with a PICU shall self-designate as either a General Pediatric Emergency Care Facility with a PICU or a CRPC.~~

~~(33) PICU/PI. Pediatric Intensive Care Unit.~~

~~(41) PIPS. Performance Improvement and Patient Safety.~~

(Rule 0720-31-.01, continued)

- ~~(42) Primary Pediatric Emergency Facility. The facility shall provide the same services as a Basic Pediatric Emergency Facility in addition to limited capabilities for the management of lower acuity pediatric admissions and observations.~~
- ~~(34) Primary Pediatric Emergency Facility. The facility shall provide the same services as a Basic Pediatric Emergency Facility and shall have limited capabilities for the management of minor pediatric inpatient problems and may accept appropriate transfers of pediatric patients when there is no facility with more comprehensive capabilities available within a region.~~
- ~~(43) PTC. Pediatric Trauma Center.~~
- ~~(44) QA. Quality Assessment.~~
- ~~(35) QA. Quality Assurance.~~
- ~~(45) QI. Quality Improvement.~~
- ~~(36) QI. Quality Intervention.~~
- ~~(46) RA. Readily Available. Available within one hour.~~
- ~~(3747) RN. Registered Nurse.~~
- ~~(48) RT. Licensed Respiratory Therapist.~~
- ~~(38) RRT. Registered Respiratory Therapist.~~
- ~~(3949) SE. Strongly Encouraged if such services are not available within a reasonable distance.~~
- ~~(50) TNCC. Trauma Nursing Core Course.~~
- ~~(4051) Trauma. A physical injury or wound caused by external force or violence.~~
- ~~(52) Trauma Program Leader. A trauma program director, manager or nurse coordinator.~~
- ~~(53) Trauma Registry. A central registry compiled of injury incidence information supplied by designated trauma centers and Comprehensive Regional Pediatric Centers (CRPC's).~~
- ~~(41) Trauma Registry. A central registry compiled of injury incidence information supplied by designated trauma centers and Comprehensive Regional Pediatric Centers (CRPC's) for the purposes of allowing the Board to analyze data and conduct special studies regarding the causes and consequences of traumatic injury.~~
- ~~(54) Trauma Team. Trauma Team consists of the necessary personnel commensurate with the level of trauma activation.~~
- ~~(42) TRACS. Trauma Registry of American College of Surgeons.~~

0720-31-.02 LICENSING PROCEDURE.

- ~~(1) The facility shall designate the classification of Pediatric Emergency Care Facility it will maintain and the level of care it will provide and submit this information to the Department of Health on the joint annual report. If multiple facilities operate under the same provider number, each geographically distinct facility shall designate the level at which it provides service and will be surveyed at that level.~~
- ~~(1) The hospital shall designate the classification of Pediatric Emergency Care Facility it will maintain and the level of care it will provide and submit this information to the Department of Health on the joint annual report.~~

(Rule 0720-31-.03, continued)

0720-31-.03 ADMINISTRATION.

- (1) The hospital-facility administration shall provide the following:
 - (a) Adequate and properly trained personnel who can demonstrate competency in pediatric patient care delivery in their assigned area of the facility. This shall include, but is not limited to, the following required pediatric skills and competencies that are assessed annually:
 1. Recognition, interpretation and recording of age-appropriate physiological variables;
 2. Capable of managing pediatric shock and respiratory failure including early recognition and stabilization of problems that may lead to shock and respiratory failure;
 3. Medication administration and fluid administration;
 4. Resuscitation (including cardiopulmonary resuscitation certification and PALS or similar certification);
 5. Respiratory care techniques;
 6. Preparation and maintenance of patient monitors; and
 7. Principles of patient and family-centered care and psychosocial skills to meet the needs of both the patient and his/her family.
 - (a) Adequate and properly trained personnel to provide the services expected at the designated Pediatric Emergency Care Facility classification.
 - (b) A policy requiring annual pediatric multidisciplinary mock codes for staff caring for pediatric patients.
 - (c) A Physician Pediatric Emergency Care Coordinator and a Nurse Pediatric Emergency Care Coordinator responsible for assuring readiness of staff and facility to provide emergency services to children at the facility's designated level of care.
 1. The physician PECC and the nurse PECC shall work collaboratively to facilitate all aspects of pediatric readiness within the facility. Aspects of pediatric readiness shall include but are not limited to multidisciplinary staff education, medication, equipment, supplies, quality and performance improvement, policies and procedures, integration of pediatric needs in facility disaster and/or emergency plans and collaboration with regional pediatric care agencies and committees.
 2. The physician and nurse PECCs may be concurrently assigned other roles in the ED or may oversee more than one program in the ED. The CRPC who has the educational agreement with the facility shall be notified of any changes in the Physician and Nurse PECC personnel.
 3. PECC roles may be shared through formal agreements with administrative entities when applied within facility systems.
 - (d) The financial resources to provide the emergency department or the pediatric emergency department with the equipment necessary to provide the level of services of the designated PECF classification.

(Rule 0720-31-.03, continued)

- (e) Facilities designed for easy access and appropriate for the care of pediatric patients at the designated PECF classification.
- (f) Access to emergency care for all urgent and emergent pediatric patients regardless of financial status.
- (g) Participation in a network of pediatric emergency care within the region where it is located by linking the facility with a regional referral center to:
 - 1. guarantee transfer and transport agreements to include at least one CRPC, and
 - 2. refer critically ill patients to an appropriate facility.
- (h) Basic, Primary, General, and General with a PICU facilities shall have one education agreement with a CRPC.
- (i) A collaborative environment with EMS and EMSC systems to educate pre-hospital personnel, nurses and physicians.
- (j) Collaboration with pre-hospital care and transport.
- (k) Public education regarding access to pediatric emergency care, injury prevention, first aid and cardiopulmonary resuscitation.
- (l) A QA and QI program in all areas that provide pediatric care that shall include, but is not limited to, the following indicators:
 - 1. deaths;
 - 2. incident reports;
 - 3. child abuse cases;
 - 4. cardiopulmonary or respiratory arrests;
 - 5. admissions within forty-eight (48) hours after being discharged from the emergency department;
 - 6. surgery within forty-eight (48) hours after being discharged from an emergency department;
 - 7. pediatric transfers;
 - 8. pediatric inpatient illness and injury outcome data;
 - 9. Participation in a QI program in both a CRPC and a General Facility with a PICU which compares their PICU performance with PICUs of similar census and capabilities;
 - 10. Program specific objectives for hospital pediatric readiness as defined by the current version of the U.S. Department of Health and Human Services' Health Resources and Services Administration's Maternal and Child Health Bureau's Emergency Medical Services for Children Program's National EMSC Performance Measures; and
 - 11. Facilities shall participate in data collection to assure that quality indicators, as established by the Board are monitored; and the data shall be made available to a central data monitoring agency, as approved by the Board.

(Rule 0720-31-.03, continued)

(m) Resuscitation equipment and a metric weight-based medication resource are available in any area caring for a pediatric patient.

- ~~(b) The financial resources to provide the emergency department or the pediatric emergency department with the equipment necessary to provide the level of services of the designated PECF classification.~~
- ~~(c) Facilities designed for easy access and appropriate for the care of pediatric patients at the designated PECF classification.~~
- ~~(d) Access to emergency care for all urgent and emergent pediatric patients regardless of financial status.~~
- ~~(e) Participation in a network of pediatric emergency care within the region where it is located by linking the facility with a regional referral center to:~~
 - ~~1. Guarantee transfer and transport agreements;~~
 - ~~2. Refer seriously and critically ill patients and special needs patients to an appropriate facility; and~~
 - ~~3. Assure the support of agreements to receive or transfer appropriate patients.~~
- ~~(f) A collaborative environment with the Emergency Medical Services and Emergency Medical Services for Children systems to educate pre-hospital personnel, nurses and physicians.~~
- ~~(g) Participation in data collection to assure that the quality indicators established by the regional resource center are monitored, and make data available to the regional resource center or a central data monitoring agency.~~
- ~~(h) Linkage with pre-hospital care and transport.~~
- ~~(i) Public education regarding access to pediatric emergency care, injury prevention, first aid and cardiopulmonary resuscitation.~~
- ~~(j) Incorporation into the hospital existing quality assessment and improvement program, a review of the following pediatric issues and indicators:~~
 - ~~1. Deaths;~~
 - ~~2. Incident reports;~~
 - ~~3. Child abuse cases;~~
 - ~~4. Cardiopulmonary or respiratory arrests;~~
 - ~~5. Admissions within 48 hours after being discharged from the emergency department;~~
 - ~~6. Surgery within 48 hours after being discharged from an emergency department;~~
 - ~~7. Quality indicators requested by the Comprehensive Regional Pediatric Center or state/local Emergency Medical Services for Children authority regarding nursing care, physician care, pre-hospital care and the medical direction for pre-hospital providers of Emergency Medical Services systems;~~

(Rule 0720-31-.03, continued)

~~8. Pediatric transfers; and~~

~~9. Pediatric inpatient illness and injury outcome data.~~

(2) In a Comprehensive Regional Pediatric Center, hospital facility administration shall also:

(a) Provide assistance to local and state agencies for ~~Emergency Medical Services~~EMS and ~~Emergency Medical Services for Children~~EMSC in organizing and implementing a network for providing pediatric emergency care within a defined region that:

1. pProvides transfer and transport agreements with other classifications of facilities;

2. pProvides transport services when needed for receiving critically ill or injured patients within the regional network;

3. pProvides necessary consultation to participating network hospitals;

4. organizes and implements a network of educational support that:

(i) trains instructors to teach pediatric pre-hospital, nursing and physician-level emergency care;

(ii) assures that training courses are available to all facilities and health care providers utilizing pediatric emergency care facilities within the region;

(iii) supports EMS agencies and EMS Directors in maintaining a regional network of pre-hospital provider education and training;

(iv) assures dissemination of new information and maintenance of pediatric emergency skills;

(v) updates standards of care protocols for pediatric emergency care;

(vi) assures that emergency departments and pediatric intensive care units within the facility shall participate in regional education for emergency medical service providers, emergency departments and the general public;

(vii) provides public education and promotes patient and family centered care in relation to policies, programs and environments for children treated in emergency departments.

5. assists in organizing and providing support for regional, state and national data collection efforts for EMSC that:

(i) defines the population served;

(ii) maintains and monitors pediatric specific quality indicators;

(iii) includes injury and illness epidemiology;

(iv) includes trauma/illness registry (this shall include severity, site, mechanism and classification of injury/illness, plus demographic information, outcomes and transport information);

(Rule 0720-31-.03, continued)

- (v) is adaptable to answer questions for clinical research; and
- (vi) supports active institutional and collaborative regional and statewide research.
 - ~~4. Provides indirect (off-line) consultation, support and education to regional pre-hospital systems and supports the efforts of regional and state pre-hospital committees;~~
 - ~~5. Provides medical support to assure quality direct (on-line) medical control for all pre-hospital systems within the region;~~
 - ~~6. Organizes and implements a network of educational support that:~~
 - ~~(i) Trains instructors to teach pediatric pre-hospital, nursing and physician-level emergency care;~~
 - ~~(ii) Assures that training courses are available to all hospitals and health care providers utilizing pediatric emergency care facilities within the region;~~
 - ~~(iii) Supports Emergency Medical Service agencies and Emergency Medical Services Directors in maintaining a regional network of pre-hospital provider education and training;~~
 - ~~(iv) Assures dissemination of new information and maintenance of pediatric emergency skills;~~
 - ~~(v) Updates standards of care protocols for pediatric emergency care;~~
 - ~~(vi) Assures that emergency departments and pediatric intensive care units within the hospital shall participate in regional education for emergency medical service providers, emergency departments and the general public;~~
 - ~~(vii) Provides for public education and promotes family-centered care in relation to policies, programs and environments for children treated in emergency departments.~~
 - ~~7. Assists in organizing and providing support for regional, state and national data collection efforts for EMSC that:~~
 - ~~(i) Defines the population served;~~
 - ~~(ii) Maintains and monitors pediatric-specific quality indicators;~~
 - ~~(iii) Includes injury and illness epidemiology;~~
 - ~~(iv) Includes trauma/illness registry (this shall include severity, site, mechanism and classification of injury/illness, plus demographic information, outcomes and transport information);~~
 - ~~(l) Each CRPC shall submit TRACS Registry data electronically to the state trauma registry on all closed patient files no less often than quarterly for the sole purpose of allowing the board to analyze causes and medical consequences of serious trauma while promoting the continuum of care that provides timely and appropriate delivery of emergency medical treatment for people with acute traumatic injury.~~

(Rule 0720-31-.03, continued)

- (II) ~~TRACS data shall be transmitted to the state trauma registry and received no later than one hundred twenty (120) days after each quarter.~~
 - (III) ~~Failure to timely submit TRACS data to the state trauma registry for three (3) consecutive quarters shall result in the delinquent facility's necessity to appear before the Board for any disciplinary action it deems appropriate, including, but not limited to, citation of civil monetary penalties and/or loss of CRPC designation status.~~
 - (IV) ~~CRPC's shall maintain documentation to show that timely transmissions have been submitted to the state trauma registry on a quarterly basis.~~
 - (v) ~~Is adaptable to answer questions for clinical research; and~~
 - (vi) ~~Supports active institutional and collaborative regional research.~~
- (b) Organize a structured quality assessment and improvement~~QI~~ program with the assistance and support of local/state Emergency Medical Services~~EMS~~ and Emergency Medical Services for Children~~EMSC programs~~~~agencies~~ that allows ongoing review and:
- 1. reviews all issues and indicators described under all classifications of Pediatric Emergency Care Facilities emergency departments;
 - 2. provides feedback, quality review and information to all participating facilities, EMS and transport systems, and appropriate state agencies;
 - 3. develops quality indicators for the review of pediatric care which are linked to periodic continuing education and reviewed at all participating institutions;
 - 4. reviews all pediatric trauma and medical related morbidity and mortality, including those that are primary admitted patients versus secondary transferred patients; and
 - 5. evaluates the emergency services provided for children with an emphasis on patient and family centered philosophy of care, family participation in care, family support during emergency visits and transfers and family information and decision-making.
- 1. ~~Reviews all issues and indicators described under the four classifications of Pediatric Emergency Care Facilities emergency departments;~~
 - 2. ~~Provides feedback, quality review and information to all participating hospitals, emergency medical services and transport systems, and appropriate state agencies;~~
 - 3. ~~Develops quality indicators for the review of pediatric care which are linked to periodic continuing education and reviewed at all participating institutions;~~
 - 4. ~~Reviews all trauma-related deaths, including those that are primary admitted patients versus secondary transferred patients. This review should include a morbidity and mortality review;~~
 - 5. ~~Assures quality assessment in the Emergency Department and the Pediatric Intensive Care Unit to include collaborative quality assessment, morbidity and mortality review, utilization review, medical records review, discharge criteria, planning and safety review; and~~

(Rule 0720-31-.03, continued)

- ~~6. Evaluates the emergency services provided for children for emphasis on family-centered philosophy of care, family participation in care, family support during emergency visits and transfers and family information and decision-making.~~

(c) Provide the following pediatric emergency department/trauma center personnel:

1. A physician on duty in the emergency department who is board eligible or board certified and meets the requirements of maintenance of certification in pediatric emergency medicine; or was a credentialed pediatric emergency medicine provider in Tennessee prior to the promulgation of these rules.
2. Physicians who are board eligible or board certified and meeting the requirements of maintenance of certification, or who were credentialed providers in Tennessee prior to the promulgation of these rules in the following subspecialties: pediatric surgery, pediatric orthopedic surgery, neurosurgery and pediatric anesthesiology.
- (i) These physicians shall be readily available to the emergency department twenty-four (24) hours per day, seven (7) days per week and shall also be promptly available around the clock as determined by the patient's acuity.
- (ii) For on call physician coverage, if the physician is not a pediatric subspecialty trained provider, then they should have sufficient training and experience in pediatric emergency and trauma care and be knowledgeable about current management of pediatric trauma and emergent medical problems in their specialty.
3. The CRPC shall also have other subspecialty trained surgical and medical providers who are board eligible or board certified and meeting the requirements of maintenance of certification, or who were credentialed providers in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.
4. Registered nurses with pediatric emergency, pediatric critical care or pediatric surgical experience as well as training in trauma care;
5. Laboratory personnel, a radiology technician and a respiratory therapist with pediatric experience;
6. Available support services to the emergency department as included in Table 1;
7. A CRPC Coordinator position whose responsibilities include, but are not limited to:
 - (i) being a regional liaison and coordinator for the statewide EMSC project, including participation in CRPC Coordinator meetings quarterly;
 - (ii) planning and providing educational activities to meet the needs of the emergency network facilities and pre-hospital providers;
 - (iii) support of maintaining and updating the CRPC Pediatric Facility Notebook, which may be in electronic format;
 - (iv) review and coordination of quality improvement indicators for emergency network facilities and pre-hospital providers;
 - (v) attending a conference on pediatric emergency and/or critical care on a yearly basis;

(Rule 0720-31-.03, continued)

- (vi) serving as a resource person for national, state and regional EMS health professionals, health department officials, community colleges/universities, facilities, physicians, and professional societies to coordinate EMSC project activities and share program expertise in their regions; and
- (vii) utilizing data collected by the CRPC from pre-hospital and facility records to provide data for performance improvement, education and research.
- ~~(c) Have an organized trauma training program by and for staff physicians, nurses, allied health personnel, community physicians and pre-hospital providers;~~
- ~~(d) Have an organized organ donation protocol with a transplant team or service to identify possible organ donors and assist in procuring for donation, consistent with state and federal law;~~
- ~~(e) Have a pediatric intensive care unit and emergency department (ED) in which the staff train health care professionals in basic aspects of pediatric emergency and critical care and serve as a focus for continuing education programs in pediatric emergency and critical care. In addition, staff workers in the pediatric intensive care unit and ED shall routinely attend or participate in regional and national meetings with course content pertinent to pediatric emergency and critical care.~~
- ~~(f) Assure training for pediatric intensive care unit and ED nurses in the following required skills: recognition, interpretation and recording of various physiological variables, drug administration, fluid administration, resuscitation (including cardiopulmonary resuscitation certification), respiratory care techniques (chest physiotherapy, endotracheal suctioning and management, tracheotomy care), preparation and maintenance of patient monitors, family-centered principles and psychosocial skills to meet the needs of both patient and family. PICU nurse-to-patient ratios vary with patient needs, but should range from 4 to 1 to 1 to 3.~~
- ~~(g) Establish within its organization a defined pediatric trauma/emergency service program for the injured child. The pediatric trauma/emergency program director shall be a pediatric surgeon, certified "or eligible for certification" in pediatric surgery, with demonstrated special competence in care of the injured child. The director shall have full responsibility and authority for the pediatric trauma/emergency service program.~~
- ~~(h) Provide the following pediatric emergency department/trauma center personnel:~~
 - ~~1. An emergency physician on duty in the emergency department;~~
 - ~~2. A pediatric trauma surgeon promptly available within 30 minutes;~~
 - ~~3. Two registered nurses with pediatric emergency, pediatric critical care or pediatric surgical experience as well as training in trauma care;~~
 - ~~4. A cardiothoracic surgeon who is promptly available or a transfer agreement to Level 1 trauma center;~~
 - ~~5. An orthopedic surgeon who is promptly available;~~
 - ~~6. An anesthesiologist who is promptly available. An anesthesia resident post graduate year 3 capable of assessing emergency situations and initiating proper treatment or a certified registered nurse anesthetist credentialed by the chief of anesthesia may fulfill this requirement, but a staff anesthesiologist must be available within 30 minutes;~~

(Rule 0720-31-.03, continued)

- ~~7. A neurosurgeon who is promptly available;~~
- ~~8. A pediatric respiratory therapist, laboratory technician and radiology technician;~~
- ~~9. A computer tomography technician in-house (or on-call and promptly available if the specific clinical needs of the hospital make this necessary and it does not have an adverse impact on patient care);~~
- ~~10. Available support services to the emergency department to include social services, chaplain support, and a child and sexual abuse team that are promptly available. These support services shall include family counseling and coordination with appropriate services to support the psychological, financial or other needs of families;~~
- ~~11. A pediatric nursing coordinator who is responsible for coordination of all levels of pediatric trauma/emergency activity including data collection, quality improvement, nursing education and may include case management;~~
- ~~12. The pediatric trauma committee chaired by the director of the pediatric trauma program with representation from pediatric surgery, pediatric emergency medicine, pediatric critical care, neurosurgery, anesthesia, radiology, orthopedics, pathology, respiratory therapy, nursing and rehabilitation therapy. This committee shall assure participation in a pediatric trauma registry. There must be documentation of the subject matter discussed and attendance at all committee meetings. Periodic review should include mortality and morbidity, mechanism of injury, review of the Emergency Medical Services system locally and regionally, specific care review, trauma center/system review, and identification and solution of specific problems including organ procurement and donation;~~
- ~~13. A trauma register function shall be provided in organizations that have 500-1000 trauma admissions/observations per year; and~~
- ~~14. A CRPC coordinator position whose responsibilities include:
 - ~~(i) Acting as a regional liaison and coordinator for the statewide EMSC project;~~
 - ~~(ii) Planning and providing educational activities to meet the needs of the emergency network hospitals and pre-hospital providers; and~~
 - ~~(iii) Maintaining and updating the CRPC Pediatric Facility Notebook;~~~~

0720-31-.04 ADMISSIONS, DISCHARGES AND TRANSFERS.

- (1) All levels of Pediatric Emergency Care Facilities shall:
 - (a) be capable of providing appropriate triage, resuscitation, stabilization and, when appropriate, timely transfer of pediatric patients for a higher level of care;
 - (b) be responsible for having appropriate transfer agreements to assure that all pediatric patients receive timely emergency care at the most appropriate pediatric facility available;

(Rule 0720-31-.04, continued)

- (c) have transfer agreements and transfer guidelines in accordance with the current Health Resources and Services Administration (HRSA) EMSC performance measures requirements;
 - (d) have the ability to communicate with a Comprehensive Regional Pediatric Center for pediatric consultation; and
 - (e) develop policies that describe safe transport and handoff of patients between all patient care areas of the facility and between other facilities.
 - ~~(1) A Basic, Primary, or General Facility shall be capable of providing resuscitation, stabilization and timely triage for all pediatric patients and, when appropriate, transfer of patients to a higher-level facility. A Basic, Primary, or General Pediatric Emergency Facility is responsible for having appropriate transfer agreements to assure that all pediatric patients receive timely emergency care at the most appropriate pediatric facility available to a specific region. Each facility shall be linked with a Comprehensive Regional Pediatric Center for pediatric consultation.~~
 - (2) A Primary Pediatric Emergency Facility shall support Basic Facilities within a region when necessary by having triage and transfer agreements to receive appropriate patients as a part of a regional pediatric care network.
 - (3) A General Pediatric Emergency Facility shall support the Basic and Primary Facilities within a region by having triage and transfer agreements to receive appropriate patients as a part of a regional pediatric care network.
 - (4) A General Pediatric Emergency Facility shall have a defined separate pediatric inpatient service with a department of pediatrics within the medical staff structure.
 - (5) A Comprehensive Regional Pediatric Center shall:
 - (a) Assist with the provision of regional pre-hospital indirect (off-line) and direct (on-line) medical control for pediatric patients.
 - (b) Promote a regional network of indirect and direct medical control by lower-level non-CRPC facilities/hospitals within the region by working closely with the regional Emergency Medical Services/EMS medical directors to assure:
 - 1. standards for pre-hospital care;
 - 2. triage and transfer guidelines; and
 - 3. quality indicators for pre-hospital care.
 - (c) Accept all patients who require a higher level of care not available at non-CRPC facilities through:
 - 1. prearranged transfer agreements to facilitate timely inter-facility triage and transfer of pediatric patients who need a higher level of care not available at the non-CRPC facility; and
 - 2. prearranged transfer agreements for pediatric patients needing specialized care not available at the Comprehensive Regional Pediatric Center
 - (d) Assure a pediatric transport service that:
 - 1. is available to all regional facilities;

2. provides a network for transport of appropriate patients from all regional hospitals to the Comprehensive Regional Pediatric Center or to an alternative facility when necessary; and

(a) — Assist with the provision of regional pre-hospital direct medical control for pediatric patients.

1. Standards for pre-hospital care;

3.——Quality indicators for pre-hospital care.

1. Prearranged transfer agreements that network hospitals within a region to assure appropriate inter-emergency department triage and transfer to assure optimum care for seriously and critically ill or injured pediatric patients; and

(d) — Assure a pediatric transport service that:

2. Provides a network for transport of appropriate patients from all regional hospitals to the Comprehensive Regional Pediatric Center or to an alternative facility when necessary; and

(e) Provide 24-hour consultation to all lower-level facilities for issues regarding:

2. ~~Triage and transfer; and~~

(Rule 0720-31-.04, continued)

~~3. Transport.~~

- ~~(f) Develop policies that describe mechanisms to achieve smooth and timely exchange of patients between emergency department, operating room, imaging facilities, special procedure areas, regular inpatient care areas, and the pediatric intensive care unit.~~

0720-31-.05 BASIC FUNCTIONS.

(1) Medical Services.

- (a) A Basic Pediatric Emergency Facility shall have an on-call physician who shall be promptly available and provide direction for the emergency department nursing staff. The physician and associated mid-level practitioner(s) providing care in the emergency department shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. ATLS certification is strongly encouraged. A system shall be developed for access to physicians who have advanced airway and vascular access skills as well as for general surgery and pediatric specialty consultation. A back-up system must be in place for additional registered nurse staffing for emergencies. ATLS certification is strongly encouraged.
- (b) A Primary Pediatric Emergency Facility shall have an emergency physician in-house twenty-four (24) hours per day, seven (7) days per week. The emergency department physician shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. A pediatrician or family practitioner, general surgeon with trauma experience, anesthetist/anesthesiologist, and radiologist shall be promptly available twenty-four (24) hours per day. ATLS certification is strongly encouraged.
- (c) A General Pediatric Emergency Facility shall have a board certified or board eligible emergency physician or pediatrician in the emergency department twenty-four (24) hours per day, seven (7) days per week. The emergency department physician shall be currently PALS certified and competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills, vascular access skills, and be able to perform a screening neurologic assessment and to interpret diagnostic tests, laboratory values, physical signs and vital signs appropriate for the patient's age. A General Pediatric Emergency Facility shall have an emergency department medical director who is board certified or board eligible/admissible in pediatrics or emergency medicine. A record of the appointment and acceptance shall be in writing. The physician director shall work with administration to assure physician coverage that is highly skilled in pediatric emergencies. ATLS certification is strongly encouraged.
- (d) A CRPC and a PTC shall have a emergency department medical director who is board certified or board eligible in pediatric emergency medicine. A record of the appointment and acceptance shall be in writing.
- (e) A CRPC and a PTC shall have twenty-four (24) hours ED coverage by physicians who are board eligible or board certified and meet the requirements of maintenance of certification in pediatric emergency medicine, or who were credentialed pediatric

(Rule 0720-31-.05, continued)

emergency medicine providers in Tennessee prior to the promulgation of these rules. The medical director shall work with administration to assure highly skilled pediatric emergency physician coverage. All physicians in pediatric emergency medicine shall participate on at least an annual basis, in continuing medical education activities relevant to pediatric emergency care and shall have successfully completed the ATLS course at least once. Maintenance of current ATLS certification status is strongly encouraged.

- (f) A CRPC and a General Facility with a PICU shall have an appointed medical director of the pediatric intensive care unit. A record of the appointment and acceptance shall be in writing. The medical director of the pediatric intensive care unit shall have a minimum of three (3) years experience as an attending in pediatric critical care and shall be board certified and meet the requirements of maintenance of certification in pediatric critical care medicine or have been an existing medical director of a PICU prior to the promulgation of these rules.
- (g) In a CRPC and General Facility with a PICU, PICU physicians shall be credentialed by the facility to practice pediatric critical care medicine and be board eligible or board certified and meet the requirements of maintenance of certification in pediatric critical care medicine or be a credentialed pediatric critical care provider in Tennessee prior to the promulgation of these rules.
- (h) In a CRPC and General Facility with a PICU, the pediatric intensive care unit and ED medical director shall participate in developing and reviewing their respective unit policies, promote policy implementation, participate in budget preparation, help coordinate staff education, maintain a database which describe unit experience and performance, supervise resuscitation techniques, lead quality improvement activities and coordinate research.
- (i) In a CRPC and General Facility with a PICU, the pediatric intensive care unit medical director shall name qualified substitutes to fulfill his or her duties during absences. The pediatric intensive care unit medical director or designated substitute shall have the institutional authority to consult on the care of all pediatric intensive care unit patients when indicated. He or she may serve as the attending physician on all, some or none of the patients in the unit.
- (j) The CRPC and General Facility with a PICU shall have:

 - (i) at least one pediatric critical care physician promptly available to the PICU twenty-four (24) hours per day, and
 - (ii) at least one in-house physician with a minimum of post graduate year level 3 training with current PALS certification and approval by the PICU medical director, or at least one mid-level practitioner credentialed by the institution to provide pediatric critical care services who is PALS trained and approved by the PICU medical director.

All providers in pediatric critical care shall participate in continuing medical education activities as per facility policies relevant to pediatric intensive care medicine.
- (k) The CRPC shall have pediatric subspecialty trained surgical and medical providers who are board eligible or board certified and meeting the requirements of maintenance of certification in their subspecialty or who are credentialed providers in their subspecialty in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.
- (a) In a Basic Pediatric Emergency Facility an on-call physician shall be promptly available and provide direction for the in-house nursing staff. The physician shall be competent

(Rule 0720-31-.05, continued)

in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills (intubation, needle thoracostomy), vascular access skills (including intraosseous needle insertion), and be able to perform a thorough screening neurologic assessment and to interpret physical signs and laboratory values in an age-appropriate manner. For physicians not board-certified/prepared by the American Board of Emergency Medicine, successful completion of courses such as Pediatric Advanced Life Support (PALS) or the American Academy of Pediatrics and American College of Emergency Physician's Advanced Pediatric Life Support (APLS) can be utilized to demonstrate this clinical capability. An on-call system shall be developed for access to physicians who have advanced airway and vascular access skills as well as for general surgery and pediatric specialty consultation. A back-up system must be in place for additional registered nurse staffing for emergencies.

- (b) ~~A Primary or General Pediatric Emergency Facility shall have an emergency physician in-house 24 hours per day, 7 days per week. The emergency department physician shall be competent in the care of pediatric emergencies including the recognition and management of shock and respiratory failure, the stabilization of pediatric trauma patients, advanced airway skills (intubation, needle thoracostomy), vascular access skills (including intraosseous needle insertion), and be able to perform a thorough screening neurologic assessment and to interpret physical signs and laboratory values in an age-appropriate manner. For physicians not board-certified board prepared by the American Board of Emergency Medicine, successful completion of courses such as Pediatric Advanced Life Support (PALS) or the American Academy of Pediatrics and American College of Emergency Physician's Advanced Pediatric Life Support (APLS) can be utilized to demonstrate this clinical capability. A pediatrician or family practitioner, general surgeon with trauma experience, anesthetist/anesthesiologist, and radiologist shall be promptly available 24 hours per day.~~
- (c) ~~A General Pediatric Emergency Facility shall have a physician director who is board certified/admissible in an appropriate primary care board. A record of the appointment and acceptance shall be in writing. The physician director shall work with administration to assure physician coverage that is highly skilled in pediatric emergencies.~~
- (d) ~~In a Comprehensive Regional Pediatric Center, the emergency department medical director shall be board certified in pediatric emergency medicine or board admissible. A record of the appointment and acceptance shall be in writing.~~
- (e) ~~A Comprehensive Regional Pediatric Center shall have 24 hours ED coverage by physicians who are board certified in pediatrics or emergency medicine, and preferably board certified, board admissible, or fellows (second year level or above) in pediatric emergency medicine. The medical director shall work with administration to assure highly skilled pediatric emergency physician coverage. All physicians in pediatric emergency medicine shall participate on at least an annual basis, in continuing medical education activities relevant to pediatric emergency care.~~
- (f) ~~In a Comprehensive Regional Pediatric Center the pediatric intensive care unit shall have an appointed medical director. A record of the appointment and acceptance shall be in writing. Medical directors of the pediatric intensive care center shall meet one of the following criteria: (1) board-certified in pediatrics and board-certified or in the process of certification in pediatric critical care medicine; (2) board-certified in anesthesiology with practice limited to infants and children and with special qualifications (as defined by the American Board of Anesthesiology) in critical care medicine; or (3) board-certified in pediatric surgery with added qualifications (as defined by the American Board of Surgery) in surgical critical care medicine. The~~

(Rule 0720-31-.05, continued)

~~pediatric intensive care unit medical director shall achieve certification within five years of their initial acceptance into the certification process for critical care medicine.~~

- ~~(g) The pediatric intensive care unit and ED medical director shall participate in developing and reviewing their respective unit policies, promote policy implementation, participate in budget preparation, help coordinate staff education, maintain a database which describe unit experience and performance, supervise resuscitation techniques, lead quality improvement activities and coordinate research.~~
- ~~(h) The pediatric intensive care unit medical director shall name qualified substitutes to fulfill his or her duties during absences. The pediatric intensive care unit medical director or designated substitute shall have the institutional authority to consult on the care of all pediatric intensive care unit patients when indicated. He or she may serve as the attending physician on all, some or none of the patients in the unit.~~
- ~~(i) The pediatric intensive care unit shall have at least one physician of at least the postgraduate year 2 level available to the pediatric intensive care units in-house 24 hours per day. All physicians in pediatric critical care shall participate on at least an annual basis, in continuing medical education activities relevant to pediatric intensive care medicine.~~
- ~~(j) Specialist consultants shall be board certified or board prepared and actively seeking certification in disciplines in which a specialty exists. A Comprehensive Regional Pediatric Center shall be staffed with specialist consultants with pediatric subspecialty training.~~

(2) Nursing Services.

- (a) Emergency staff in all facilities shall be able to provide information on patient encounters to the patient's medical home through telephone contact with the primary care provider at the time of encounter, by faxing or by electronic means. Follow-up visits shall be arranged or recommended with the primary care provider whenever necessary.
- (b) In all Pediatric Emergency Facilities at least one RN shall be physically present 24 hours per day, 7 days per week, and capable of recognizing and managing pediatric shock and respiratory failure and stabilizing pediatric patients, including early recognition and stabilization of problems that may lead to shock and respiratory failure. At least one emergency room nurse per shift must be PALS certified. Certification in ENPC and TNCC is strongly encouraged.
- (c) A Pediatric General Emergency Facility shall have an emergency department nursing director/manager and at least one nurse per shift with pediatric emergency nursing experience. Nursing administration shall assure adequate staffing for data collection and performance monitoring as well as a registered nurse responsible for ongoing coordination of education in pediatric emergency care.
- (d) In a Comprehensive Regional Pediatric Center, administration shall provide nursing director/manager dedicated to the pediatric emergency department. The nurse director/manager shall have specific training and experience in pediatric emergency care and shall participate in the development of written policies and procedures for the pediatric emergency department, coordination of staff education, coordination of research, patient and family centered care, QI, and budget preparation in collaboration with the pediatric emergency department medical director. The nurse director/manager shall name qualified substitutes to fulfill the nurse director/manager's duties during absences.

(Rule 0720-31-.05, continued)

- (e) In a Comprehensive Regional Pediatric Center nursing administration shall provide nursing staff experienced in pediatric emergency and trauma nursing care and a registered nurse trained in pediatric specific education/competencies responsible for ongoing staff education.
- (f) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide a nurse director/manager dedicated to the pediatric intensive care unit. The nurse director/manager shall have specific training and experience in pediatric critical care and shall participate in the development of written policies and procedures for the pediatric intensive care unit, coordination of staff education, coordination or research, patient and family centered care, QI and budget preparation in collaboration with the PICU medical director. The nurse director/manager shall name qualified substitutes to fulfill the nurse director/manager's duties during absences.
- (g) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide a pediatric nurse educator for pediatric emergency care and pediatric critical care education.
- (h) In a Comprehensive Regional Pediatric Center, or a General Facility with a PICU, administration shall provide an orientation to the pediatric emergency department and the pediatric intensive care unit staff and specialized nursing staff shall be Pediatric Advanced Life Support certified. Administration shall assure staff competency in pediatric emergency care and intensive care.
- ~~(a) Emergency staff in all facilities shall be able to provide information on patient encounters to the patient's medical home through telephone contact with the primary care provider at the time of encounter, by faxing or mailing the medical record to the primary care provider, or by providing the patient with a copy of the medical record to take to the physician. Follow-up visits shall be arranged or recommended with the primary care provider whenever necessary.~~
- ~~(b) In Basic Pediatric Emergency Facilities at least one RN or physician's assistant shall be physically present 24 hours per day, 7 days per week, and capable of recognizing and managing shock and respiratory failure and stabilizing pediatric trauma patients, including early recognition and stabilization of problems that may lead to shock and respiratory failure. At least one emergency room registered nurse or physician's assistant per shift shall have successfully completed courses such as the Emergency Medical Services for Children/American Heart Association Pediatric Advanced Life Support (EMSC/PALS) course, or the Emergency Nurses Association Emergency Nursing Pediatric Course (ENPC) and can demonstrate this clinical capability. Documentation of current expiration date for the above courses shall be maintained by the facility and available upon request.~~
- ~~(c) In Primary or General Pediatric Emergency Facilities at least one RN shall be physically present 24 hours per day, 7 days per week, and capable of recognizing and managing shock and respiratory failure and stabilizing pediatric trauma patients, including early recognition and stabilization of problems that may lead to shock and respiratory failure. At least one emergency room nurse per shift shall have successfully completed courses such as the PALS or ENPC and can demonstrate this clinical capability.~~
- ~~(d) A Pediatric General Emergency Facility shall have an emergency department nursing director/manager and at least one nurse per shift with pediatric emergency nursing experience. Nursing administration shall assure adequate staffing for data collection and performance monitoring.~~

(Rule 0720-31-.05, continued)

- ~~(e) — A Comprehensive Regional Pediatric Center shall have a pediatric emergency department director/manager and a registered nurse responsible for ongoing staff education.~~
 - ~~(f) — In a Comprehensive Regional Pediatric Center nursing administration shall provide nursing staff experienced in pediatric emergency and trauma nursing care.~~
 - ~~(g) — In a Comprehensive Regional Pediatric Center nursing administration shall provide a nurse manager dedicated to the pediatric intensive care unit. The nurse manager shall have specific training and experience in pediatric critical care and shall participate in the development of written policies and procedures for the pediatric intensive care unit, coordination of staff education, coordination of research, family-centered care and budget preparation, with the medical director, in collaboration with the pediatric intensive care unit. The nurse manager shall name qualified substitutes to fulfill his or her duties during absences.~~
 - ~~(h) — In a Comprehensive Regional Pediatric Center nursing administration shall provide a nurse educator for pediatric emergency care and critical care education.~~
 - ~~(i) — In a Comprehensive Regional Pediatric Center nursing administration shall provide an orientation to the pediatric emergency department and the pediatric intensive care unit staff and specialized nursing staff shall be Pediatric Advanced Life Support certified. Nursing administration shall assure staff competency in pediatric emergency care and intensive care.~~
- (3) Other Personnel.
- (a) In a Comprehensive Regional Pediatric Center or a General Facility with a PICU, the respiratory therapy department shall have a supervisor responsible for performance and pediatric training of staff, maintaining equipment and monitoring QI and review. Under the supervisor's direction, respiratory therapy staff assigned primarily to the pediatric intensive care unit and the emergency department shall be in-house twenty-four (24) hours per day and shall be PALS certified and maintain ongoing competencies.
 - (b) In a Comprehensive Regional Pediatric Center or a General Facility with a PICU, Biomedical technicians shall be available within one (1) hour. Unit secretaries or trained designees shall be available to the pediatric intensive care unit and emergency department twenty-four (24) hours per day. A radiology technician and pharmacist with pediatric training must be in-house 24 hours per day. In addition, social workers, case managers, physical therapists, occupational therapists, speech therapists, child life specialists, clergy and nutritionists/registered dietician must be available.
 - (c) In all PECF, the radiology department shall have guidelines for reducing radiation exposure that are age and size specific in accordance with ALARA or current American College of Radiology guidelines.
- ~~(a) — The respiratory therapy department shall have a supervisor responsible for performance and training of staff, maintaining equipment and monitoring quality improvement and review. Under the supervisor's direction, respiratory therapy staff assigned primarily to the pediatric intensive care unit shall be in-house 24 hours per day.~~
 - ~~(b) — Biomedical technicians shall be either in-house or available within 1 hour, 24 hours per day. Unit secretaries (clerks) shall be available to the pediatric intensive care unit and emergency department 24 hours per day. A radiology technician and pharmacist must~~

(Rule 0720-31-.05, continued)

be in-house 24 hours per day. In addition, social workers, physical therapists, occupational therapists and nutritionists must be available. The availability of child life specialists and clergy is strongly encouraged.

(4) Facility Structure and Equipment.

(a) Equipment for communication with EMS mobile units is essential if there is no higher-level facility capable of receiving ambulances or there are no resources for providing medical control to the pre-hospital system.

(b) An emergency cart or other systems to organize supplies including resuscitation equipment, drugs, printed pediatric drug doses and pediatric reference materials must be readily available. Equipment, supplies, trays, and medications shall be easily accessible, labeled and logically organized. Antidotes necessary for a specific geographic area should be determined through consultation with a poison control center. If the listed medications are not kept in the emergency department, they should be kept well organized and together in a location easily accessible and proximate to the emergency department.

(c) A Comprehensive Regional Pediatric Center emergency department must have geographically separate and distinct pediatric medical/trauma areas that have all the staff, equipment and skills necessary for comprehensive pediatric emergency care. Separate fully equipped pediatric resuscitation rooms must be available and capable of supporting at least two simultaneous resuscitations.

(4) Facility Structure and Equipment.

(a) A General Pediatric Emergency Facility shall have access to a pediatric intensive care unit. This requirement may be fulfilled by having transfer and transport agreements available for moving critically ill or injured patients to a Comprehensive Regional Pediatric Center.

(b) A Comprehensive Regional Pediatric Center shall have a pediatric intensive care unit.

(c) A Comprehensive Regional Pediatric Center shall be qualified and competent as a pediatric trauma center, and satisfy the requirements in Table 1. A CRPC may fulfill this requirement by having written agreements with another CRPC that meets the State's criteria for level I trauma or an Adult Level I trauma center within the same region.

(d) Equipment for communication with Emergency Medical Services mobile units is essential if there is no higher-level facility capable of receiving ambulances or there are no resources for providing medical control to the pre-hospital system.

(e) An emergency cart or other systems to organize supplies including resuscitation equipment, drugs, printed pediatric drug doses and pediatric reference materials must be readily available. Equipment, supplies, trays, and medications shall be easily accessible, labeled and logically organized. Antidotes necessary for a specific geographic area should be determined through consultation with a poison control center. If the listed medications are not kept in the emergency department, they should be kept well organized and together in a location easily accessible and proximate to the emergency department.

(f) A Comprehensive Regional Pediatric Center emergency department must have geographically separate and distinct pediatric medical/trauma areas that have all the staff, equipment and skills necessary for comprehensive pediatric emergency care. Separate fully equipped pediatric resuscitation rooms must be available and capable of

(Rule 0720-31-.05, continued)

~~supporting at least two simultaneous resuscitations. A pediatric intensive care unit must be available within the institution.~~

- (5) Infection Control. A Pediatric Emergency Care Facility shall have an annual influenza vaccination program which shall include at least:
 - (a) The offer of influenza vaccination to all staff and independent practitioners at no cost to the person or acceptance of documented evidence of vaccination from another vaccine source or facility. The Pediatric Emergency Care Facility will encourage all staff and independent practitioners to obtain an influenza vaccination;
 - (b) A signed declination statement on record from all who refuse the influenza vaccination for reasons other than medical contraindications (a sample form is available at <http://tennessee.gov/health/topic/hcf-provider>);
 - (c) Education of all employees about the following:
 - 1. Flu vaccination,
 - 2. Non-vaccine control measures, and
 - 3. The diagnosis, transmission, and potential impact of influenza;
 - (d) An annual evaluation of the influenza vaccination program and reasons for non-participation; and
 - (e) A statement that the requirements to complete vaccinations or declination statements shall be suspended by the administrator in the event of a vaccine shortage as declared by the Commissioner or the Commissioner's designee.

0720-31-.06 PEDIATRIC TRAUMA

(1) A CRPC and a state designated pediatric trauma center shall have a pediatric trauma program with the following requirements:

(a) A pediatric trauma medical director who shall be a pediatric surgeon, board certified/board eligible in pediatric surgery, with demonstrated competence in care of the injured child. The director shall have full responsibility and authority for the pediatric trauma program and shall meet the following requirements:

- 1. 36 hours of category I external trauma/critical care CME every three (3) years or twelve (12) hours each year, and attend one national meeting whose focus is pediatric trauma or critical care every three (3) years;
- 2. Participates in the physician call schedule;
- 3. Has the authority to manage all aspects of trauma care;
- 4. Authorizes trauma service privileges of the on-call providers;
- 5. Works in cooperation with nursing administration to support the nursing needs of trauma patients;
- 6. Develops treatment protocols along with the trauma team;
- 7. Coordinates performance improvement and peer review processes;

(Rule 0720-31-.05, continued)

8. With the assistance of the facility administration and the trauma program coordinator, be involved in coordinating the budgetary process for the trauma program;
 9. Participates in regional and national trauma organizations; and
 10. Retains a current ATLS certification and participates in the provision of trauma-related instruction to other health care personnel.
- (b) Current board certified/board eligible pediatric surgeons on the trauma service who shall have successfully completed the ATLS course at least once. Maintenance of current ATLS status is strongly encouraged.
- (c) Shall be involved in local/regional EMS agencies/facilities and/or personnel and assist in trauma education, performance improvement, and feedback regarding care.
- (d) A Trauma Program Leader who shall:
 1. Be an RN with experience in Pediatric Emergency and/or Critical Care Nursing;
 2. Have a defined job description and organizational chart delineating roles and responsibilities;
 3. Be provided the administrative and budgetary support to complete educational, clinical, administrative and outreach activities for the trauma program; and
 4. Show evidence of educational preparation with a minimum of 12 hours internal or external of trauma related continuing education per year. This shall include attending one (1) national meeting within a three (3) year trauma program designated cycle.
- (e) Shall submit Trauma Registry data electronically to the state trauma registry on all closed patient files for the Board to analyze.
 1. Data shall be transmitted to the state trauma registry in accordance with the state trauma rules. Failure to submit data may result in the delinquent facility's necessity to appear before the Board for any disciplinary action it deems appropriate.
 2. Shall have a full-time equivalent trauma registrar for each five hundred (500) through seven hundred fifty (750) trauma patients per year.
- (f) The pediatric trauma program must annually admit two hundred (200) or more pediatric trauma patients younger than fifteen (15) years of age. These admissions may include inpatient or twenty-three (23) hour observations, but should exclude patients admitted for drowning, poisoning, foreign bodies, asphyxiation or suffocation without presence of injury, patients who are dead on arrival to the facility or other pediatric patients excluded as per the most recent version of the Resources for Optimal Care of the Injured Patient by the American College of Surgeons Committee on Trauma.
- (g) Shall have a pediatric trauma committee chaired by the pediatric trauma medical director with designated representation from pediatric general surgery and liaisons to the trauma program from pediatric emergency medicine, pediatric critical care, neurosurgery, pediatric anesthesia, pediatric radiology, pediatric orthopedics, and the pediatric trauma program leader. The pediatric trauma committee shall meet at least quarterly. Members or designees shall attend at least fifty percent (50%) of meetings.

(Rule 0720-31-.05, continued)

1. This committee shall assure participation in a pediatric trauma process improvement program with the following requirements and responsibilities:
 - (i) Administration shall provide resources to support the trauma process improvement program;
 - (ii) A performance improvement coordinator shall be designated with dedicated time for this responsibility;
 - (iii) The trauma registry shall be used to support the PIPS process;
 - (iv) Identify process and outcome measures;
 - (v) Have a morbidity and mortality review of trauma patients;
 - (vi) Maintain a Trauma Bypass/Diversion log:
 - (I) Trauma bypass/diversion shall not exceed five percent (5%).
 - (II) Pediatric surgery on-call shall be involved in bypass/diversion decisions.
 - (III) All bypass/diversions shall be reviewed.
 - (vii) Document and review response/consult times for pediatric surgeons, neurosurgeons, pediatric anesthesia, and pediatric orthopedists, all of whom must demonstrate eighty percent (80%) compliance with facility determined timed guidelines;
 - (viii) Monitor team notification times. For highest level of trauma activation, the pediatric trauma surgeon must be present within fifteen (15) minutes of patient arrival eighty percent (80%) of the time;
 - (ix) Review pre-hospital trauma care to include patients dead on arrival;
 - (x) Review times, reasons and appropriateness of care for transfer of injured patients;
 - (xi) Demonstrate that action taken as a result of issues identified in the Process Improvement Program created a measurable improvement. Documentation shall include where appropriate: problem identification, analysis, preventability, action plan, implementation and reevaluation;
 - (xii) Evaluation of Operational Process Improvement (evaluation of systems issues) shall occur to address, assess, and correct global trauma program and system issues, and correct overall program deficiencies to continue to optimize patient care.
- (h) Shall have clearly defined graded activation criteria.
 1. Criteria for the highest level of activation shall be clearly defined and evaluated by the pediatric trauma committee.
 2. For the highest level of activation, the trauma team shall be immediately available and the pediatric trauma attending available within fifteen (15) minutes of patient arrival eighty percent (80%) of the time, and shall include a trauma chief resident with three (3) to five (5) years of post-graduate year training or a Pediatric Emergency Physician.

(Rule 0720-31-.05, continued)

- (i) Shall have an injury prevention program which:
 - 1. Shall have an organized and effective approach to injury prevention and must prioritize those efforts based on trauma registry and epidemiologic data;
 - 2. Shall have a full-time injury prevention coordinator dedicated to the trauma program to ensure community and regional injury prevention activities are implemented and evaluated for effectiveness;
 - 3. Shall implement at least two programs that address one of the major causes of injury in the community; and
 - 4. Shall screen for alcohol and drug abuse in admitted patients.
- (j) The PTC shall also have other subspecialty trained surgical and medical providers who are board eligible or board certified and meeting the requirements of maintenance of certification, or who are credentialed providers in Tennessee prior to the promulgation of these rules in their respective subspecialty as listed in Table 1.

(2) State Pediatric Trauma Center Designation

- (a) The Board shall implement the designation process.
- (b) The preliminary designation process for facilities aspiring for designation as a Pediatric Trauma Center shall consist of the following:
 - 1. Each facility desiring designation shall submit an application to the Board;
 - 2. A Department site visit team ("team") shall review each submitted application and shall act in an advisory capacity to the Board;
 - 3. The team shall communicate deemed application deficiencies to the facility in writing;
 - 4. The facility shall have thirty (30) days to submit required information; and
 - 5. Arrangements shall be made for a provisional site visit for those facilities meeting application requirements.
- (c) The site visit team shall consist of the following for Pediatric Trauma Centers:
 - 1. A pediatric trauma surgeon medical director or a pediatric trauma surgeon who has previously been a medical director from an out-of-state pediatric trauma center who shall serve as team leader.
 - 2. A pediatric trauma surgeon from an in-state pediatric trauma center.
 - 3. An in-state pediatric trauma leader from a pediatric trauma center.
 - 4. The state trauma program manager and/or state EMS director.
- (d) The team shall be appointed by the state trauma system director and/or state trauma system assistant director.
- (e) The team shall conduct a provisional visit to ensure compliance with all criteria required for designation as a Pediatric Trauma Center. During the provisional visit, the applicant shall

(Rule 0720-31-.05, continued)

- demonstrate that the required mechanisms to meet the criteria for the desired designation level are in place.
- (f) The team shall identify deficiencies and areas for improvement it deems necessary for designation.
- (g) If the team does not cite any deficiencies and concludes that the facility is otherwise in compliance with all applicable standards it shall approve the applicant to function with provisional status for a period of one (1) year.
- (h) If, during the provisional visit, the team cites deficiencies, it shall not approve provisional status for the applicant to function as a Pediatric Trauma Center. Centers with deficiencies shall have fifteen (15) days from receipt of the deficiency report to provide documentation demonstrating compliance. If the facility is unable to correct the deficiencies within fifteen (15) days, the application shall be denied, and the applicant may not resubmit an application for trauma center designation for at least one (1) year from the date of denial.
- (i) Facilities granted provisional status as a Pediatric Trauma Center shall adhere to the following:
1. The facility shall be prepared to provide:
 - (i) A description of changes made after the grant of provisional status;
 - (ii) A description of areas of improvement cited during the provisional visit; and
 - (iii) A summary of the facility's trauma service based on the trauma registry report.
 2. The team shall conduct a site visit at the termination of the applicant's one (1) year provisional designation as a Pediatric Trauma Center.
 3. During the follow-up visit, the team shall identify the presence of deficiencies and areas of improvement.
- (j) Upon completion of the follow-up visit, the team shall submit its findings and designation recommendation to the Board.
1. If the team cites deficiencies found during its follow-up visit, they shall be included in its report to the Board.
 2. At the time that the team's report is presented to the Board, the facility requesting Pediatric Trauma Center designation shall be allowed to present evidence to the Board demonstrating action taken to correct the cited deficiencies.
- (k) The final decision regarding Pediatric Trauma Center designation shall be rendered by the Board. If granted, the designation is in effect for a period of three (3) years.
- (l) If the Board denies the application, the facility may not reapply for at least one (1) year. If provisional status was granted, such status will be revoked.
- (m) The facility applying for Pediatric Trauma Center designation shall bear all costs of the application process, including the costs of a site visit.
- (n) A facility seeking a consultation/verification site visit through the American College of Surgeons as a Level I Pediatric Trauma Center shall coordinate with state trauma system director and/or state trauma system assistant director to ensure his/her attendance at the

(Rule 0720-31-.05, continued)

ACS site visit. If state trauma system director and/or state trauma system assistant director is unable to attend the site visit, the finalized report from the site visit shall be shared with the state trauma system director and/or state trauma system assistant director for presentation to the Board if the facility seeks a reciprocal designation as a Pediatric Trauma Center.

- (o) Denial of Provisional or Full Designation. When the Board denies provisional or full designation, it must provide the facility with a written notification of the action and the basis for the action. The notice will inform the facility of the right to appeal and the procedure to appeal the action under the provisions of the Uniform Administrative Procedures Act.

(3) State Pediatric Trauma Center Verification

- (a) Following designation as a pediatric trauma center, a verification site visit shall be conducted at the facility every three (3) years.
- (b) The team shall advise the center of an upcoming verification visit at least sixty (60) days prior to the visit. After the facility receives notice of the upcoming verification site visit, it shall prepare all materials the team requests for submission.
- (c) The team shall conduct an exit interview with the facility at the conclusion of the verification visit.
- (d) During the exit interview the team shall communicate the following:
1. The presence of deficiencies;
 2. The facility's strengths and weaknesses; and
 3. Recommendations for improvements and correction of deficiencies.
- (e) The team shall submit a site visit report within sixty (60) days of completion of the site visit. It shall submit a copy of the report to the Board, the Chief Executive Officer of the facility, the Pediatric Trauma Medical Director and the Pediatric Trauma Program Manager (TPM).
- (f) If the team does not cite deficiencies and the center is in compliance with all applicable standards, it shall recommend that the facility maintain its designation as a Pediatric Trauma Center for a period of three (3) additional years.
- (g) If during the site visit the team identifies deficiencies, the center shall have a period not to exceed sixty (60) days to correct deficiencies.
- (h) If the team ascertains that deficiencies have not been corrected within sixty (60) days, whether through desk review or an on-site visit, the center must present an explanation to the Board at its next scheduled meeting.
- (i) The facility shall bear all costs of the verification process, including the costs of a site visit.
- (j) If a Pediatric Trauma Center already designated by the Board elects to undergo an American College of Surgeons Pediatric Level I trauma center consultation/verification site visit, the facility shall coordinate with the state trauma system director and/or state trauma system assistant director to ensure his/her attendance at the review. If the state trauma system director and/or state trauma system assistant director is unable to attend the site visit, the finalized report from the site visit shall be shared with the state trauma system director and/or state trauma system assistant director for presentation to the Board if the facility seeks a reciprocal state designation as a Pediatric Trauma Center.

(Rule 0720-31-.05, continued)

(4) State Pediatric Trauma Center Disciplinary Action

- (a) The Board may, in accordance with the Uniform Administrative Procedures Act, revoke, suspend, place on probation, or otherwise discipline, a facility's trauma center designation.
- (b) The Board may revoke, suspend, place on probation, or otherwise discipline, the designation or provisional status of a center when an owner, officer, director, manager, employee or independent contractor:
 - 1. Fails to comply with the provisions of these rules;
 - 2. Makes a false statement of material fact about the center's capabilities or other pertinent circumstances in any record or matter under investigation for any purposes connected with these rules;
 - 3. Prevents, interferes with, or attempts to impede in any way, the work of a representative of the Board;
 - 4. Falsely advertises or in any way misrepresents the facility's ability to care for patients based on its designation status;
 - 5. Fails to provide reports required by the trauma registry or the Commission in a timely and complete fashion;
 - 6. Fails to comply with or complete a plan of correction in the time or manner specified.
- (c) Denial of Provisional or Full Designation. When the Board denies provisional or full designation, it must provide the center with a written notification of the action and the basis for the action. The notice will inform the center of the right to appeal and the procedure to appeal the action under the provisions of the Uniform Administrative Procedures Act.

(5) State Pediatric Trauma Center Prohibitions

- (a) It shall be a violation of these regulations for any health care facility to hold out, advertise or otherwise represent itself to be a "trauma center" as licensed by the Board unless it has complied with the regulations set out herein and the Board has so designated it.
- (b) Any facility the Board designates as a trauma center, at any level, shall comply with the requirements of EMTALA. The medical needs of a patient and the available medical resources of the facility, rather than the financial resources of a patient, shall be the determining factors concerning the scope of service provided.
- (c) The term "trauma center" refers to a main facility campus that has met all requirements to satisfy trauma center rule designation. Off campus sites are excluded in this designation.

Chapter 0720-31 is being amended by deleting Table 1 in its entirety and replacing it with the following language, so that, as amended, the new Table 1 shall read:

Table 1 (Parts 1-6) provides a summary for emergency care facilities for each level of pediatric health care. Personnel, equipment, and issues that are essential at each designation or level are described as either being essential in the emergency department (EED), essential in the pediatric intensive care unit (EPI), essential within the facility (EF), essential in the facility and immediately available within 15 minutes (EFI), or promptly available (EP). An optional but strongly encouraged category (SE) is used to describe personnel, activities or issues that may be essential to network a comprehensive regionalized EMS-

(Rule 0720-31-.05, continued)

EMSC system in rural areas. Although these are not generally required of a specific facility, they are strongly encouraged if such services are not available within a reasonable distance.*

*Some services are usually available at a Comprehensive Regional Pediatric Center but, if not provided, then transfer agreements must be in place (ES). Other capabilities must be available in the pediatric intensive care units but should be promptly available to the emergency department and facility (EPI and EP).

0720-31 TABLE 1.

Table 1 (Parts 1-6) provides a summary for emergency care facilities for each level of pediatric health care. Personnel, equipment, and issues that are essential at each designation or level are described as either being essential in the emergency department (EED), essential in the pediatric intensive care unit (EPI), essential within the facility (EF), essential in the facility and immediately available within 15 minutes (EFI), or promptly available (EP). An optional but strongly encouraged category (SE) is used to describe personnel, activities or issues that may be essential to network a comprehensive regionalized EMS-EMSC system in rural areas. Although these are not generally required of a specific facility, they are strongly encouraged if such services are not available within a reasonable distance.*

*Some services are usually available at a Comprehensive Regional Pediatric Center but, if not provided, then transfer agreements must be in place (ES). Other capabilities must be available in the pediatric intensive care units but should be promptly available to the emergency department and facility (EPI and EP).

1 All medical specialists shall have pediatric expertise as evidenced by board certification, fellowship training, or demonstrated commitment and continuing medical education in their subspecialty area.

2 A forensic pathologist must be available either as part of the facility staff or on a consulting basis.

3 Medications may be exempted if the facility can demonstrate PALS recommendation changes, manufacturer recalls or shortages, or Food and Drug Administration requirement issues.

4 A resident in postgraduate year >3 or a pediatric emergency attending physician who is part of the trauma team may be approved to begin resuscitation while awaiting the arrival of the pediatric surgery attending/fellow, but cannot independently fulfill the responsibilities of, or substitute for, the pediatric surgery attending/fellow. The presence of such a resident or attending pediatric emergency physician may allow the surgery attending/fellow to participate in the physician call schedule from outside the facility.

5 This requirement can also be met by having one surgeon who is board certified or board eligible with demonstrated interest and skills in pediatric neurosurgical trauma care. This is evidenced by 12 hours of pediatric neurosurgical CMEs per year, of which 8 are pediatric trauma care.

6 The Vascular surgeon requirement may be provided by a pediatric trauma surgeon.

Table 1 (Parts 1-7) provides a summary for emergency care facilities for each level of pediatric health care. Personnel, equipment, and issues that are essential at each designation or level are described as either being essential in the emergency department (EED), essential in the pediatric intensive care unit (EPI), essential within the hospital (EH), or promptly available (EP). An optional but strongly encouraged category (SE) is used to describe personnel, activities or issues that may be essential to network a comprehensive regionalized EMS-EMSC system in rural areas. Although these are not generally required of a specific hospital, they are strongly encouraged if such services are not available within a reasonable distance.*

*Some services are usually available at a Comprehensive Regional Pediatric Center but, if not provided, then transfer agreements must be in place (ES). Other capabilities must be available in the pediatric

intensive care units but should be promptly available to the emergency department and hospital (EPI and EP).

¹—All medical specialists should have pediatric expertise as evidenced by board certification, fellowship training, or demonstrated commitment and continuing medical education in their subspecialty area.

²—Or substituted by a current signed transfer agreement with an institution with cardiothoracic surgery and cardiopulmonary bypass capability.

³—Forensic pathologist must be available either as part of the hospital staff or on a consulting basis.

⁴—Resuscitative medications may be exempted if the hospital can demonstrate PALS recommendation changes, manufacturer recalls or shortages, or Food and Drug Administration requirement issues.

Beta-agonist for inhalation	EED&EPI	EED	EED	EH
Bretylium	EED&EPI	EED	EH	EH
Calcium chloride	EED&EPI	EED	EH	EH
Corticosteroids (dexamethasone, methylprednisolone)	EED	EED	EED	EH
Cyanide kit and pediatric doses	EED			
Dextrose 25% and 50%	EED&EPI	EED	EED	EH
Digitalis antibody	EH	EH	EH	
Diphenhydramine	EED	EED	EED	EH
Epinephrine (1:1000, 1:10,000)	EED&EPI	EED	EED	EH
Factor VIII, IX concentrates, DDAVP	EH	EH	EH	
Flumazenil	EH	EH	EH	EH
Furosemide	EED&EPI	EED	EED	EH
Glucagon	EED	EED	EED	
Insulin	EH	EH	EH	
Ipecac	EED	EED	EED	EH
Kayexalate	EH	EH	EH	
Ketamine	EED	EH	ED	
Magnesium sulfate	EED&EPI	EED	EH	
Mannitol 20%	EED&EPI	EH	EH	
Methylene blue	EH	EH	EH	EH
N-acetyl cysteine	EH	EH	EH	
Naloxone	EED	EED	EED	EH
Potassium chloride	EED	EED	EED	
Prostaglandin	EH	EH	EH	
Sodium bicarbonate 4.2%, 7.5% and 8.4%	EED&EPI	EED	EED	EH
Succinylcholine	EED	EED	EH	
Whole bowel irrigation solution	EH	EH	EH	

(Rule 0720-31-Table 1, continued)

Part 3/6	FACILITY DESIGNATION/LEVEL					
3. FACILITIES	CRPC	General w/ PICU	General	Primary	Basic	PTC
Emergency Department						
Two or more areas with capacity and equipment to resuscitate medical/surgical/trauma pediatric patients	E					E
One or more areas as above		E	E			
Access to helicopter landing site	E	E	E	E	E	E
Facility Support Services						
Pediatric inpatient care	E	E	E			E
Pediatric intensive care unit	E	E				E
Child abuse team	E	E	E			E
Child life support	EF	EF				EF
Operating Room						
Operating room staff	EP	EP	EP	SE		EP
One PALS certified RN physically present in the OR for pediatric procedures	E	E	E			E
Operating room, dedicated to the trauma service, with adequate staff in-house and immediately available 24 hours a day						E
Second operating room available and staffed within 30 minutes	E					E
Thermal control equipment	E	E	E			E
X-ray capability, including C-arm	E	E	E			E
Endoscopes, all varieties	E					E
Craniotomy equipment, including ICP monitoring equipment	E					E
Invasive and noninvasive monitoring equipment	E	E	E			E
Pediatric anesthesia and ventilation equipment	E	E	E			E
Pediatric airway control equipment	E	E	E			E
Defibrillator, monitor, including internal and external paddles	E	E	E			E
Laparotomy tray	E	E	E			E
A rapid volume infuser for the utilization of transfusion protocol						E
Thoracotomy tray and chest retractors of appropriate size	E					E
Synthetic grafts of all sizes	E					E
Spinal and neck immobilization equipment	E					E
Fracture table with pediatric capability	E					E
Auto-transfusion with pediatric capability	E					E
Precalculated pediatric drug dosing reference in mg and mL	E	E	E	E	E	E
Tracheostomy tubes, neonatal through adolescent	E	E	E			E
Anesthesia and surgical suite promptly available	EP	EP	EP	SE		
Pediatric Intensive Care Unit						
Distinct, controlled access unit	E	E				E
Proximity to elevators	E	E				E
MD on-call room	E	E				E
Waiting room and separate family counseling room	E	E				E
Patients' personal effects storage and privacy provision	E	E				E
Patient isolation capacity and isolation cart	E	E				E

(Rule 0720-31-Table 1, continued)

Medication station with drug refrigerator and locked cabinet	E	E				E
Precalculated pediatric drug dosing reference in mg and mL	E	E				E
Emergency equipment storage	E	E				E
Separate clean and soiled utility rooms	E	E				E
Nourishment station	E	E				E
Separate staff and patient toilets	E	E				E
Two oxygen, two vacuum, and > 2 compressed air outlets/bed	E	E				E
Computerized lab reporting	E	E				E
Easy, rapid access to head of beds and cribs	E	E				E
Pressure monitoring capability, with 4 simultaneous pressures	E	E				E
Patient isolation capability	E	E				E
Recovery Room						
RNs and other essential personnel on call 24 hrs/day	E	E	E	E*		E
Staff competent in the post-anesthesia care of the pediatric pt.	E	E	E	E*		E
Airway equipment	E	E	E	E*		E
Pressure monitoring capability	E	E	E	E*		E
Thermal control equipment	E	E	E	E*		E
Blood warmer	E	E	E	E*		E
Resuscitation cart	E	E	E	E*		E
Immediate access to sterile surgical supplies for emergency	E	E	E	E*		E
Pediatric drug dosage chart	E	E	E	E		E
E* If surgery performed on pediatric patients						
Laboratory Services						
Hematology	E	E	E	E	E	E
Chemistry	E	E	E	E	E	E
Microbiology	E	E	E	E	SE	E
Microcapabilities	E	E	E			E
Blood bank	E	E	E	SE		E
Shall have a pediatric transfusion protocol developed collaboratively between the trauma service and the blood bank (i.e. MTP)						E
Drug levels/toxicology	E	E	SE	SE		E
Blood gases	E	E	E	E		E
Radiology Services						
Routine services 24 hours per day	EF	EF	EF	E	E	EF
Computed tomography scan 24 hours per day	EF	EF	E	SE		EF
Ultrasound 24 hours per day	E	E	E	SE		E
Magnetic Resonance Imaging Availability	E	E	E			E
Nuclear medicine	E	SE	SE			E
Fluoroscopy/contrast studies 24 hours per day	E	E	E	SE		E
Angiography 24 hours per day	E	E	E	SE		E
Interventional Radiology Services						E
Other						
Pediatric Echocardiography	EP	EP				EP
Pediatric Cardiac Catheterization *	E					E
Electroencephalography	EP	EP				EP
Access to:						

(Rule 0720-31-Table 1, continued)

Regional poison control center	E	E	E	E	E	E
Hemodialysis capability						E
Rehabilitation medicine						E
Acute spinal cord injury management capability						E
Hyperbaric oxygen chamber availability/transfer agreement when appropriate	E					E

TABLE 1. PEDIATRIC EMERGENCY CARE FACILITIES

Part 4/7	FACILITY DESIGNATION/LEVEL			
2. EQUIPMENT AND SUPPLIES (Cont.)	CRPG	General	Primary	Basic
MEDICATION CLASSES				
Analgesics	EED	EED	EH	EH
Antibiotics	EED	EED	EED	EH
Anticonvulsants	EED&EPI	EED	EED	EH
Antihypertensive agents	EED	EED	EH	EH
Antipyretics	EED	EED	EED	EH
PALS and ACLS medications	EED&EPI	EED	EED	EH
Chelating agents for heavy metal poisonings	EH			
Nondepolarizing neuromuscular blocking agents	EED	EED	EED	
Rapid sequence intubation medications	EED&EPI	EED	EH	
Sedatives and anti-anxiety medications	EED&EPI	EED	EH	EH
MISCELLANEOUS				
Resuscitation board	EED&EPI	EED	EED	EED
Infant scale	EED&EPI	EED	EED	EED
Heating source (for infant warming)	EED&EPI	EED	EED	EED
Precalculated drug sheets or length-base tape	EED	EED	EED	EED
Pediatric restraint equipment (to use for painful or difficult procedures)	EED	EED	EED	
Portable radiography	EED&EPI	EH	EH	
Slit lamp	EH	EH	EH	
Infant incubators	EH			
Bilirubin lights	EH			
Pacemaker capability	EH	EH		
Thermal control for patient and/or resuscitation room	EED	EED	EED	
3. FACILITIES				
Emergency Department				
Two or more areas with capacity and equipment to resuscitate medical/surgical/trauma pediatric patients	E			
One or more areas as above		E		
Separate Pediatric designated site	E			
Access to helicopter landing site	E	E	E	E
Hospital support services				
Pediatric inpatient care	E	E		
Pediatric intensive care unit	E			
Child abuse team	E	E		
Child life support	EH			
Operating Room				
Operating room staff	EP	EP	SE	
One RN physically present in OR	E	EP		
Second operating room available and staffed within 30 minutes	E			
Thermal control equipment	E	E		

(Rule 0720-31-Table 1, continued)

X-ray capability, including C-arm	E	E		
Endoscopes, all varieties	E			
Craniotomy equipment, including ICP monitoring equipment	E			
Invasive and noninvasive monitoring equipment	E	E		
Pediatric anesthesia and ventilation equipment	E	E		
Pediatric airway control equipment	E	E		
Defibrillator, monitor, including internal and external paddles	E	E		
Laparotomy tray	E	E		
Thoracotomy tray and chest retractors of appropriate size	E			
Synthetic grafts of all sizes	E			
Spinal and neck immobilization equipment	E			
Fracture table with pediatric capability	E			
Auto-transfusion with pediatric capability	E			
Pediatric drug dosage chart	E	E		

Part 4/6	FACILITY DESIGNATION/LEVEL					
4. ACCESS, TRIAGE, TRANSFER AND TRANSPORT	CRPC	General w/ PICU	General	Primary	Basic	PTC
Support of medical control	E	E	E	SE	SE	E
Accept call-ahead ambulance information	E	E	E	E	E	E
Transfer agreements for:						
In-patient pediatric care	E	E	E	E	E	
ICU pediatric care	E	E	E	E	E	
Major trauma care	ES	E	E	E	E	
Burn care	ES	E	E	E	E	ES
Hemodialysis and Extracorporeal Life Support	ES	E	E	E	E	
Spinal injury care	ES	E	E	E	E	
Rehabilitation care	ES	E	E	E	E	
Reimplantation, hand & microvascular surgery						ES
Accept all critically ill patients from lower-level facilities within a region	E	SE				
Access to transport services appropriate for pediatrics	E	E	E	E	E	E
Provide 24-hour consultation to lower-level facilities	E					E
Consultation agreements with CRPC		E	E	E	E	E
Accepts all critically ill pediatric trauma patients from lower level facilities within a region	E					E
